

1 Semantic interference in a delayed naming task: Evidence for the response exclusion hypothesis.

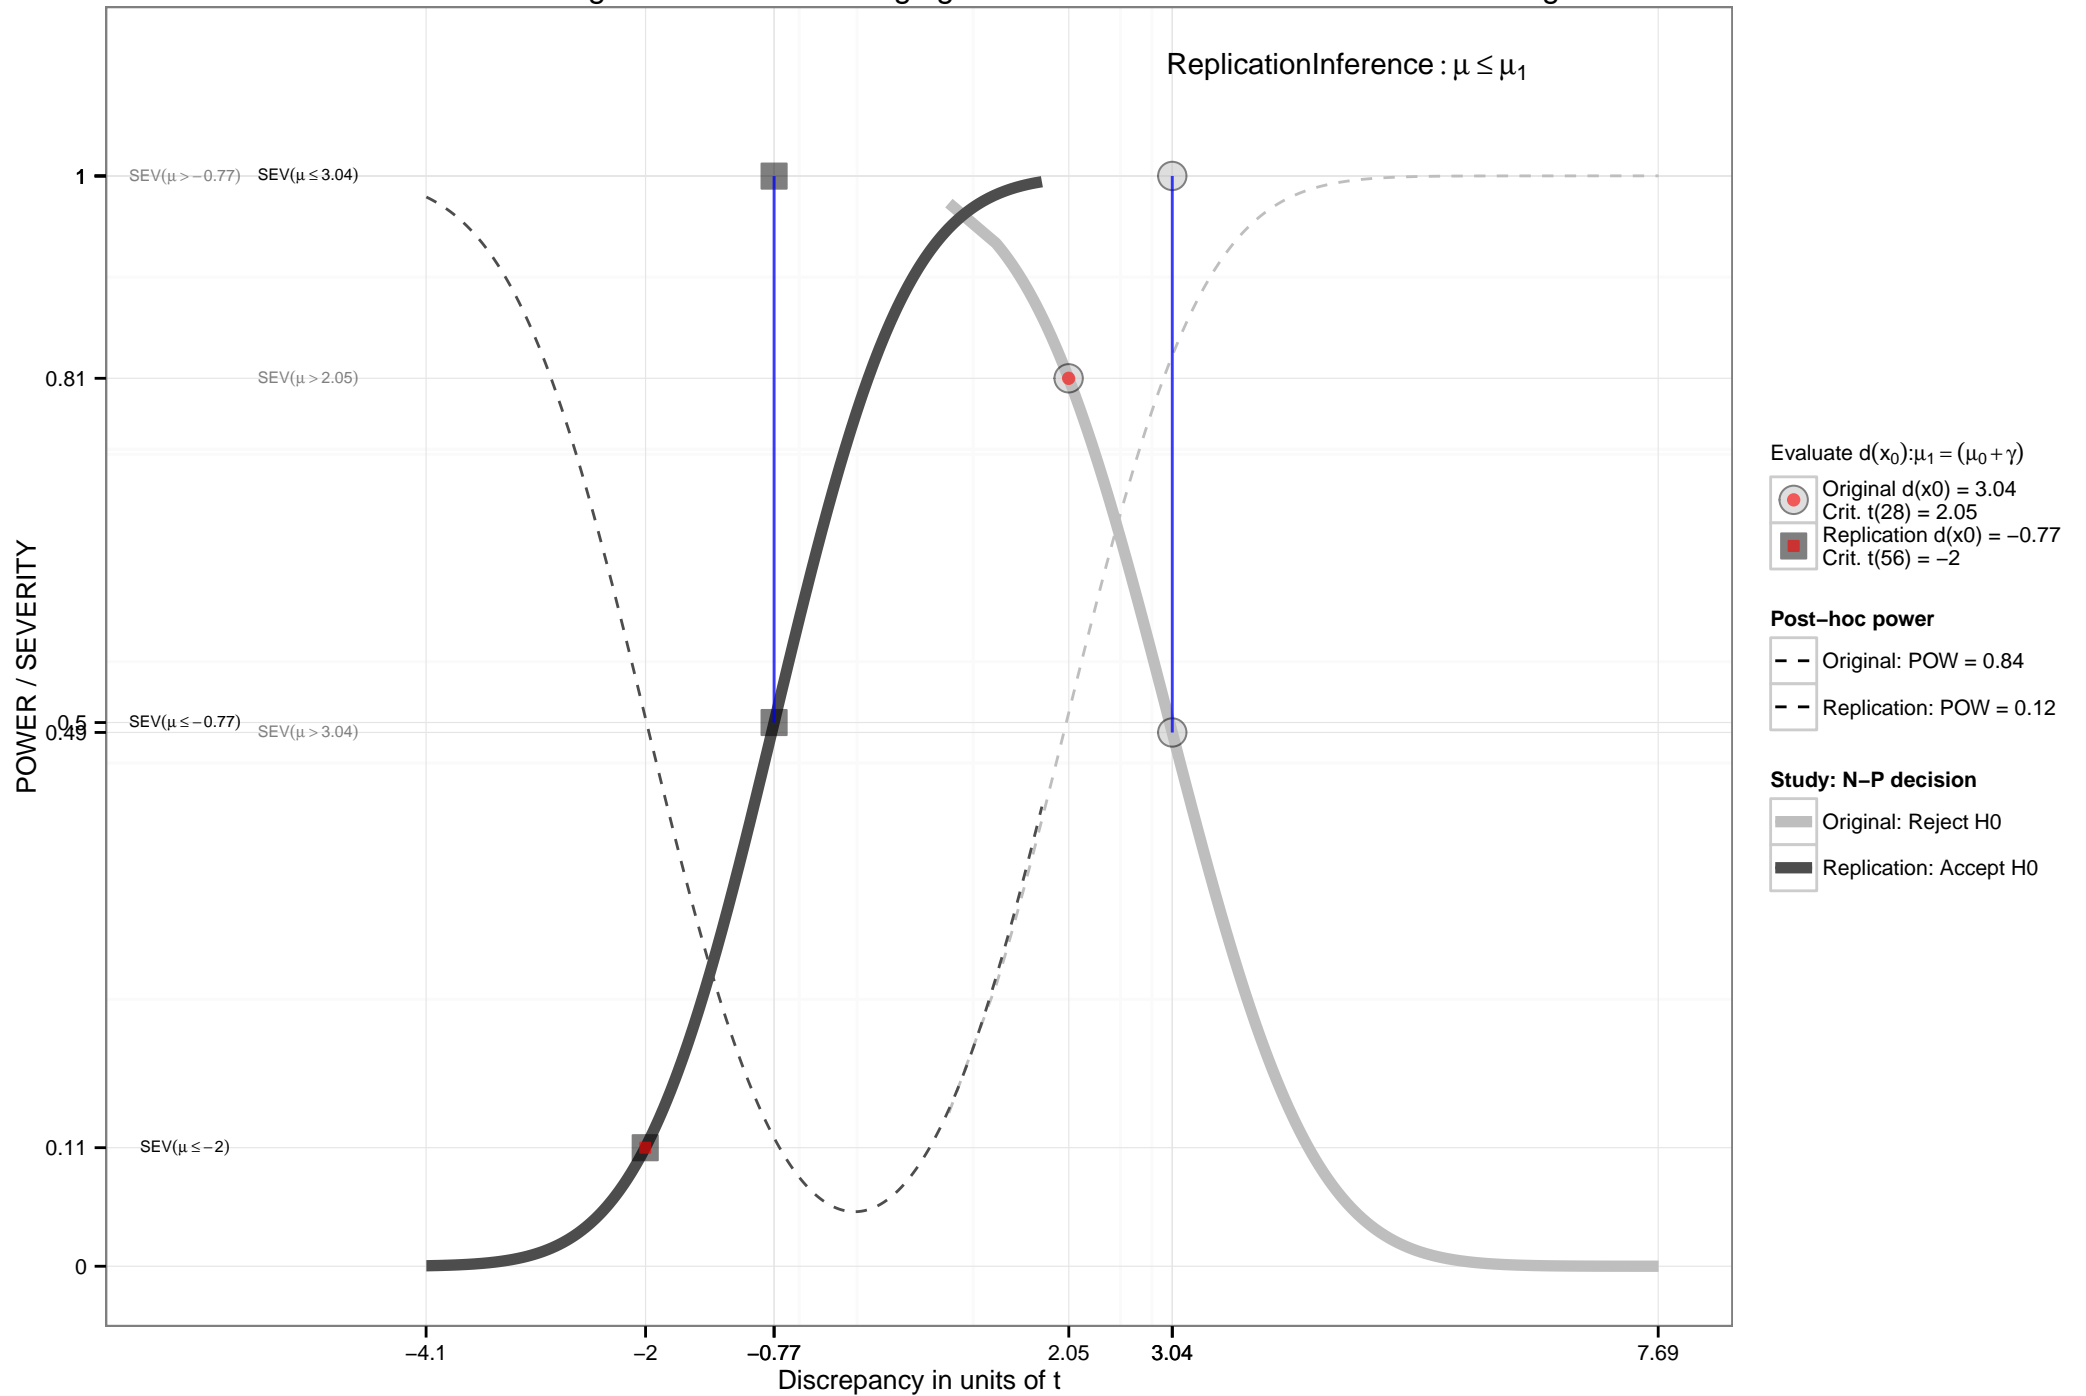

2 Intentional forgetting is easier after two \shots\ than one.

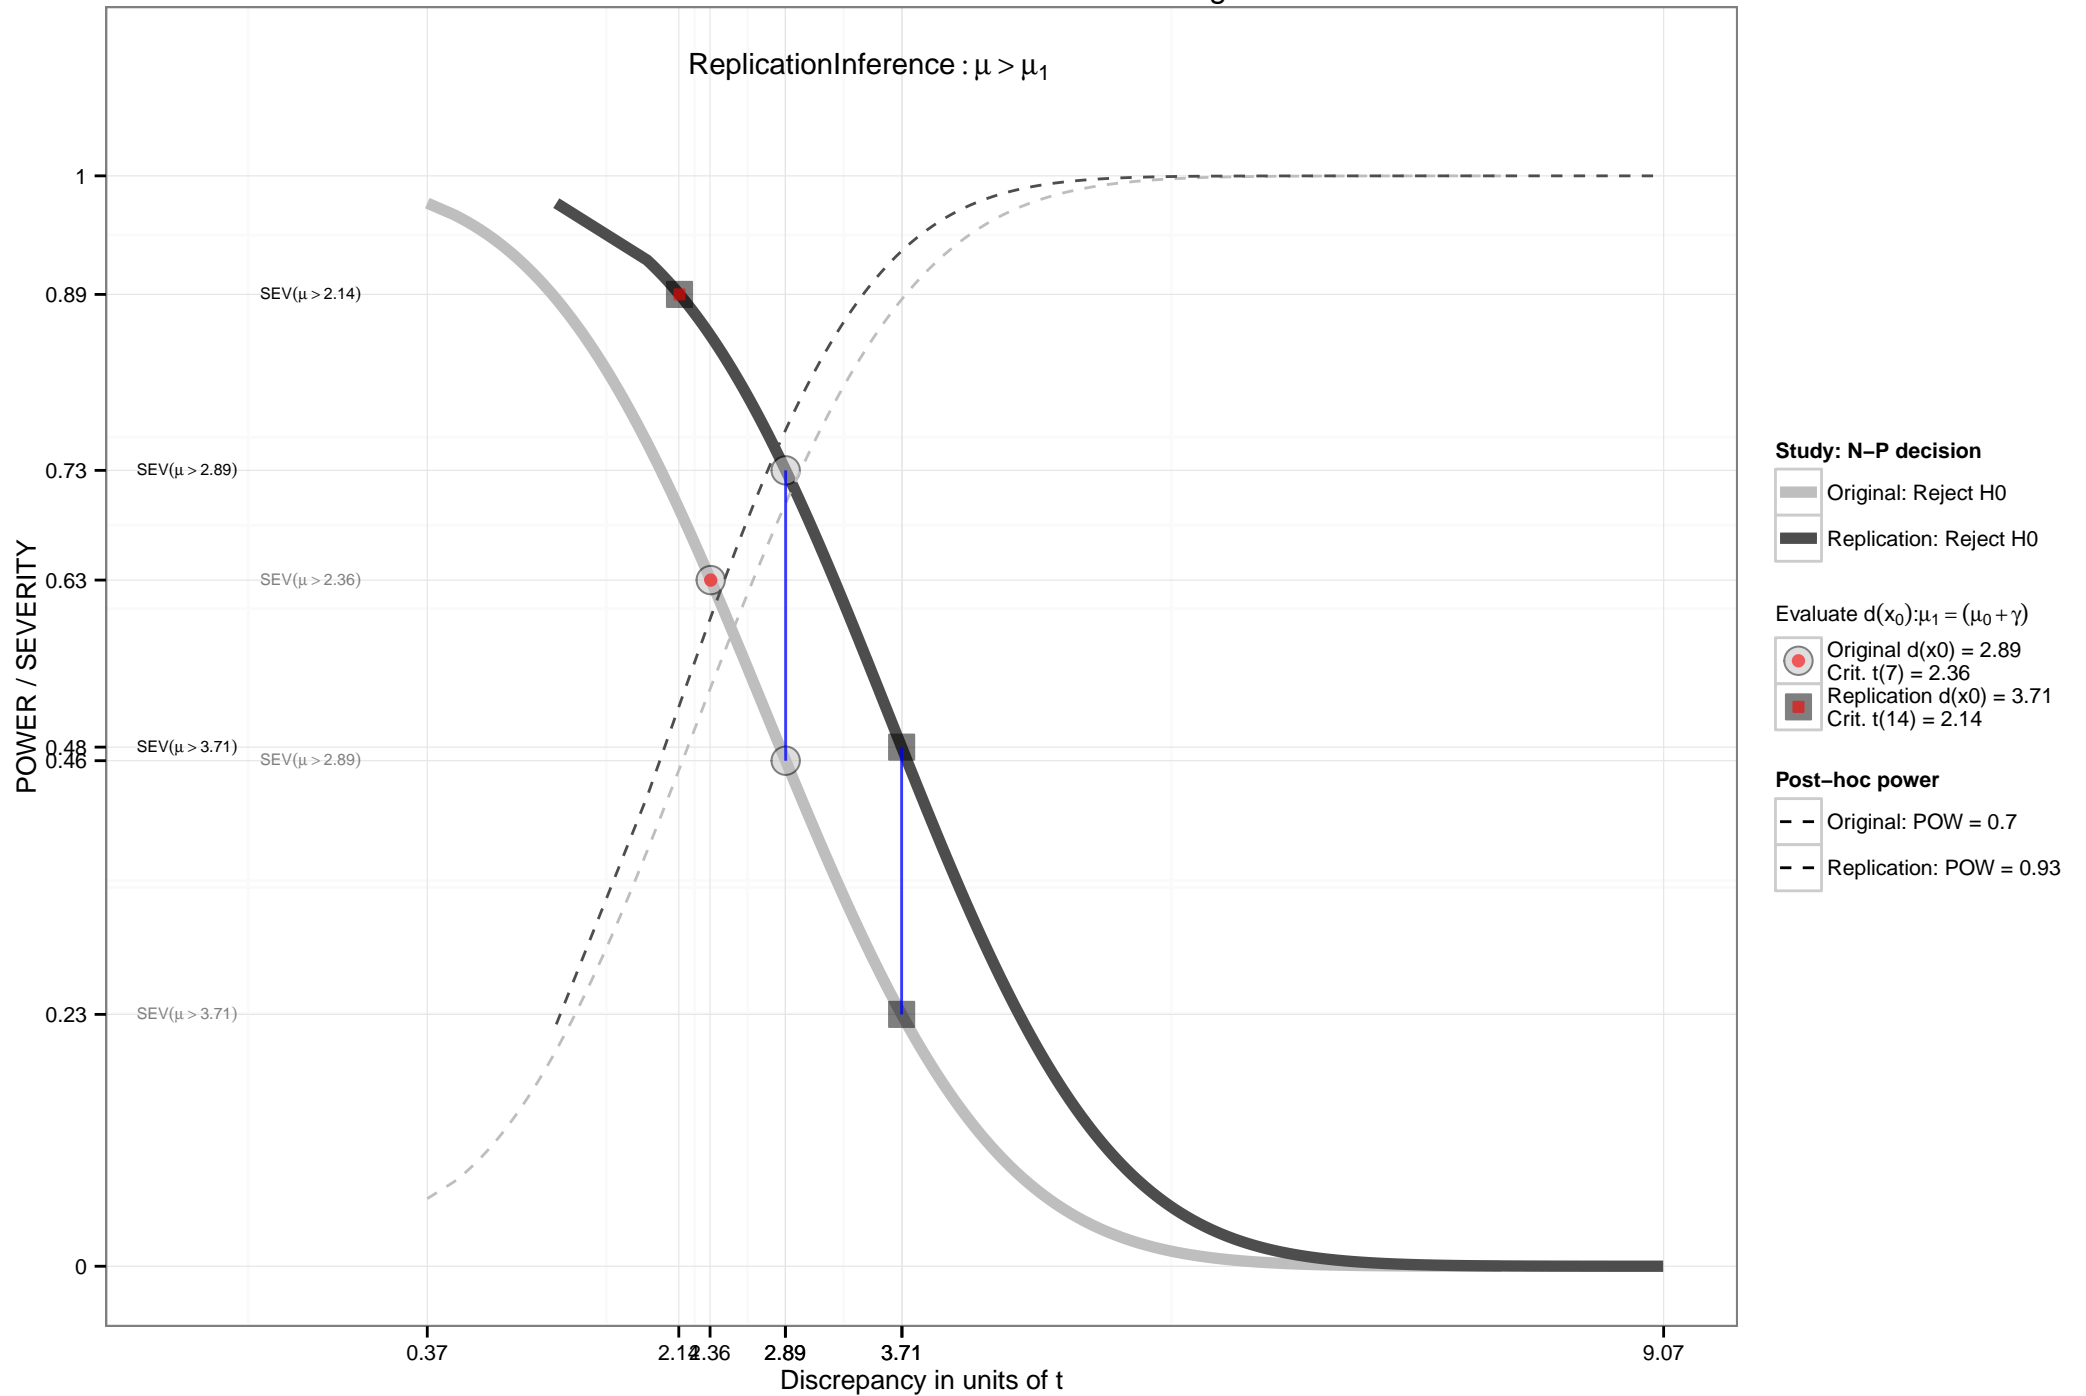

eds-based model of reconciliation: Satisfying the differential emotional needs of victim and perpetrator as a key to promoting reconciliation.

4 The value of believing in free will: Encouraging a belief in determinism increases cheating.

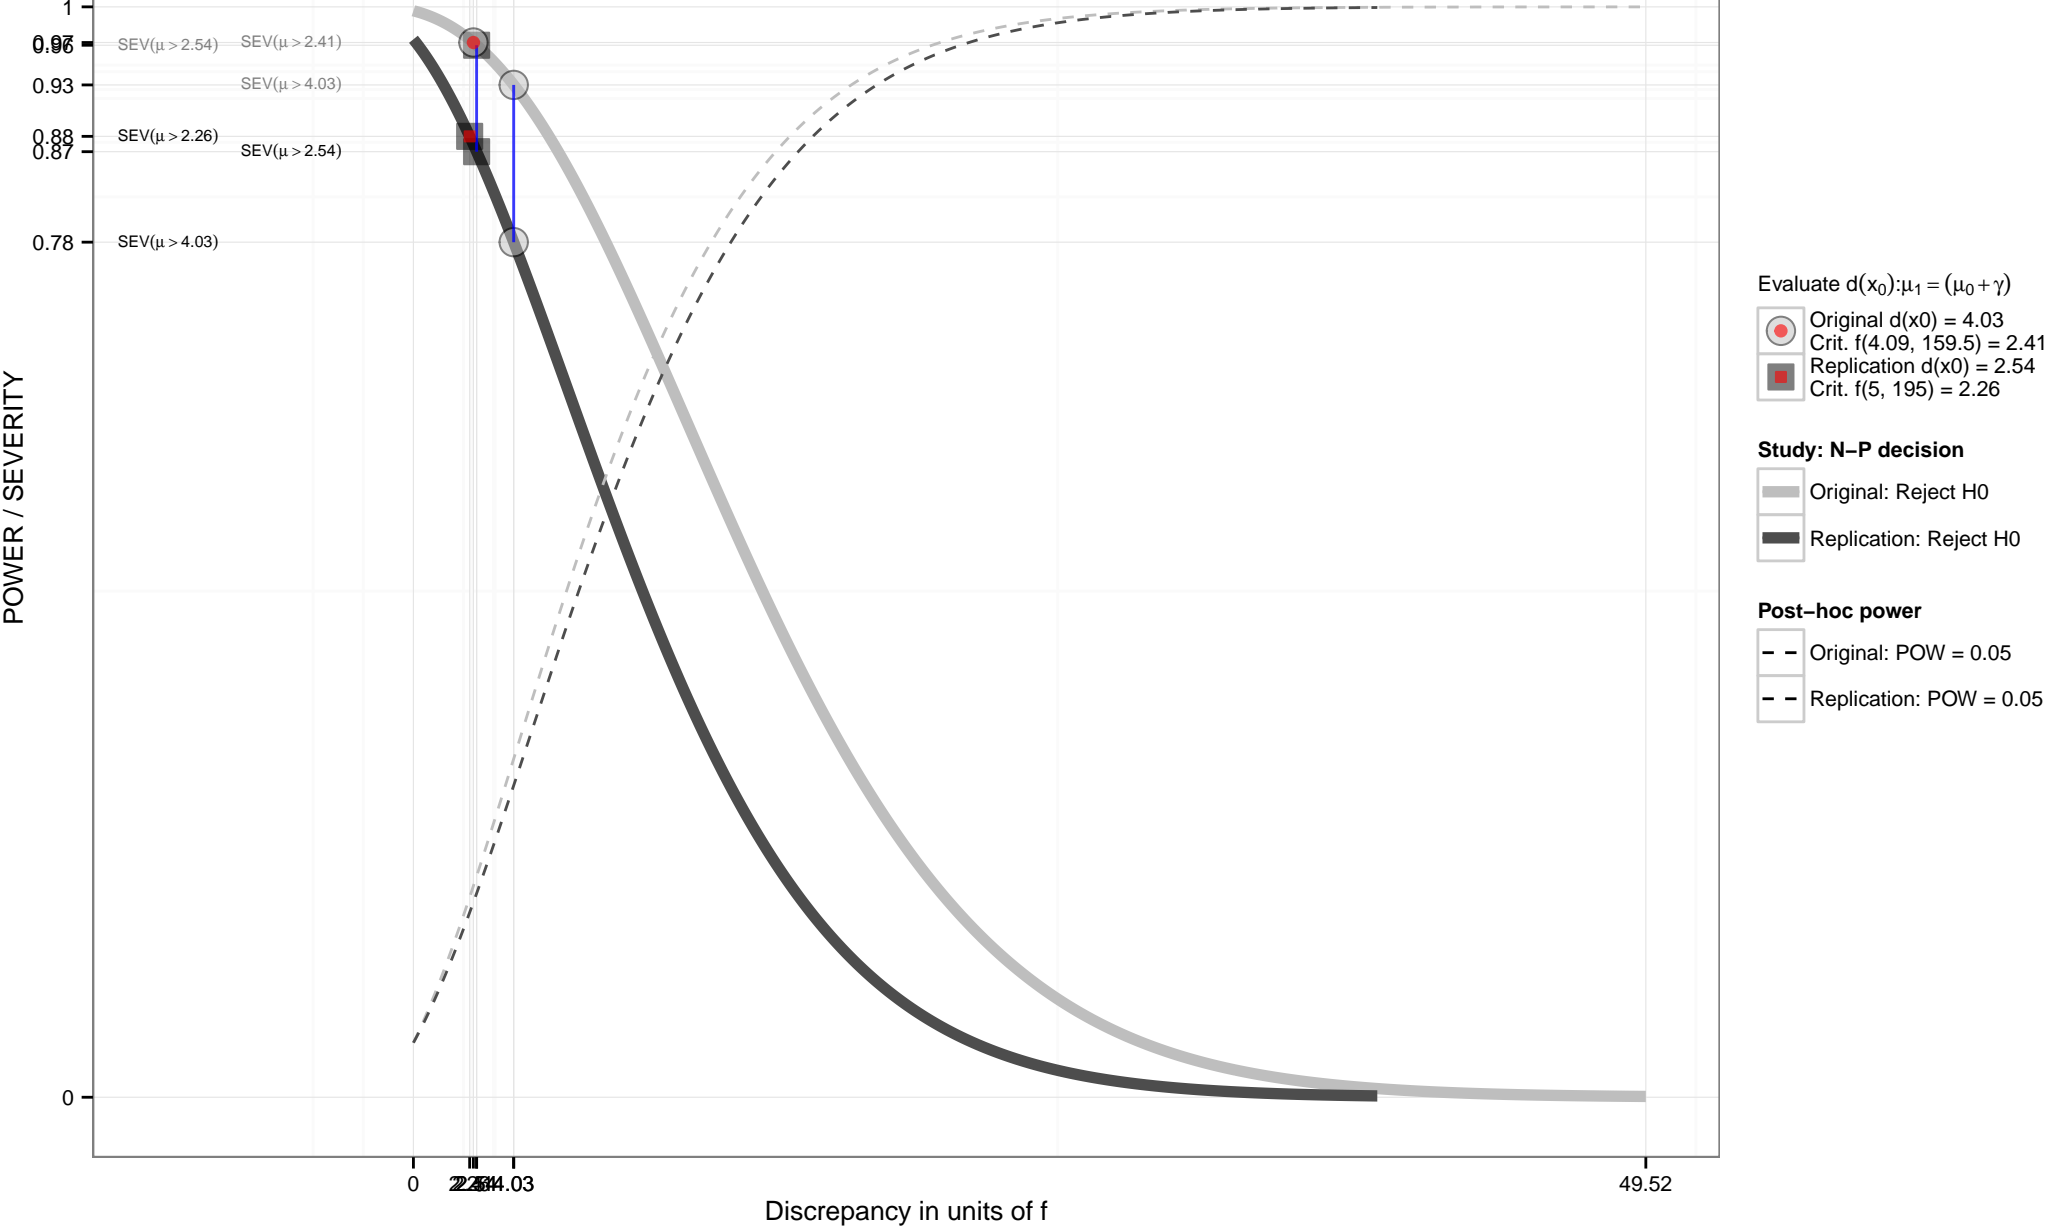

5 Multidimensional visual statistical learning.

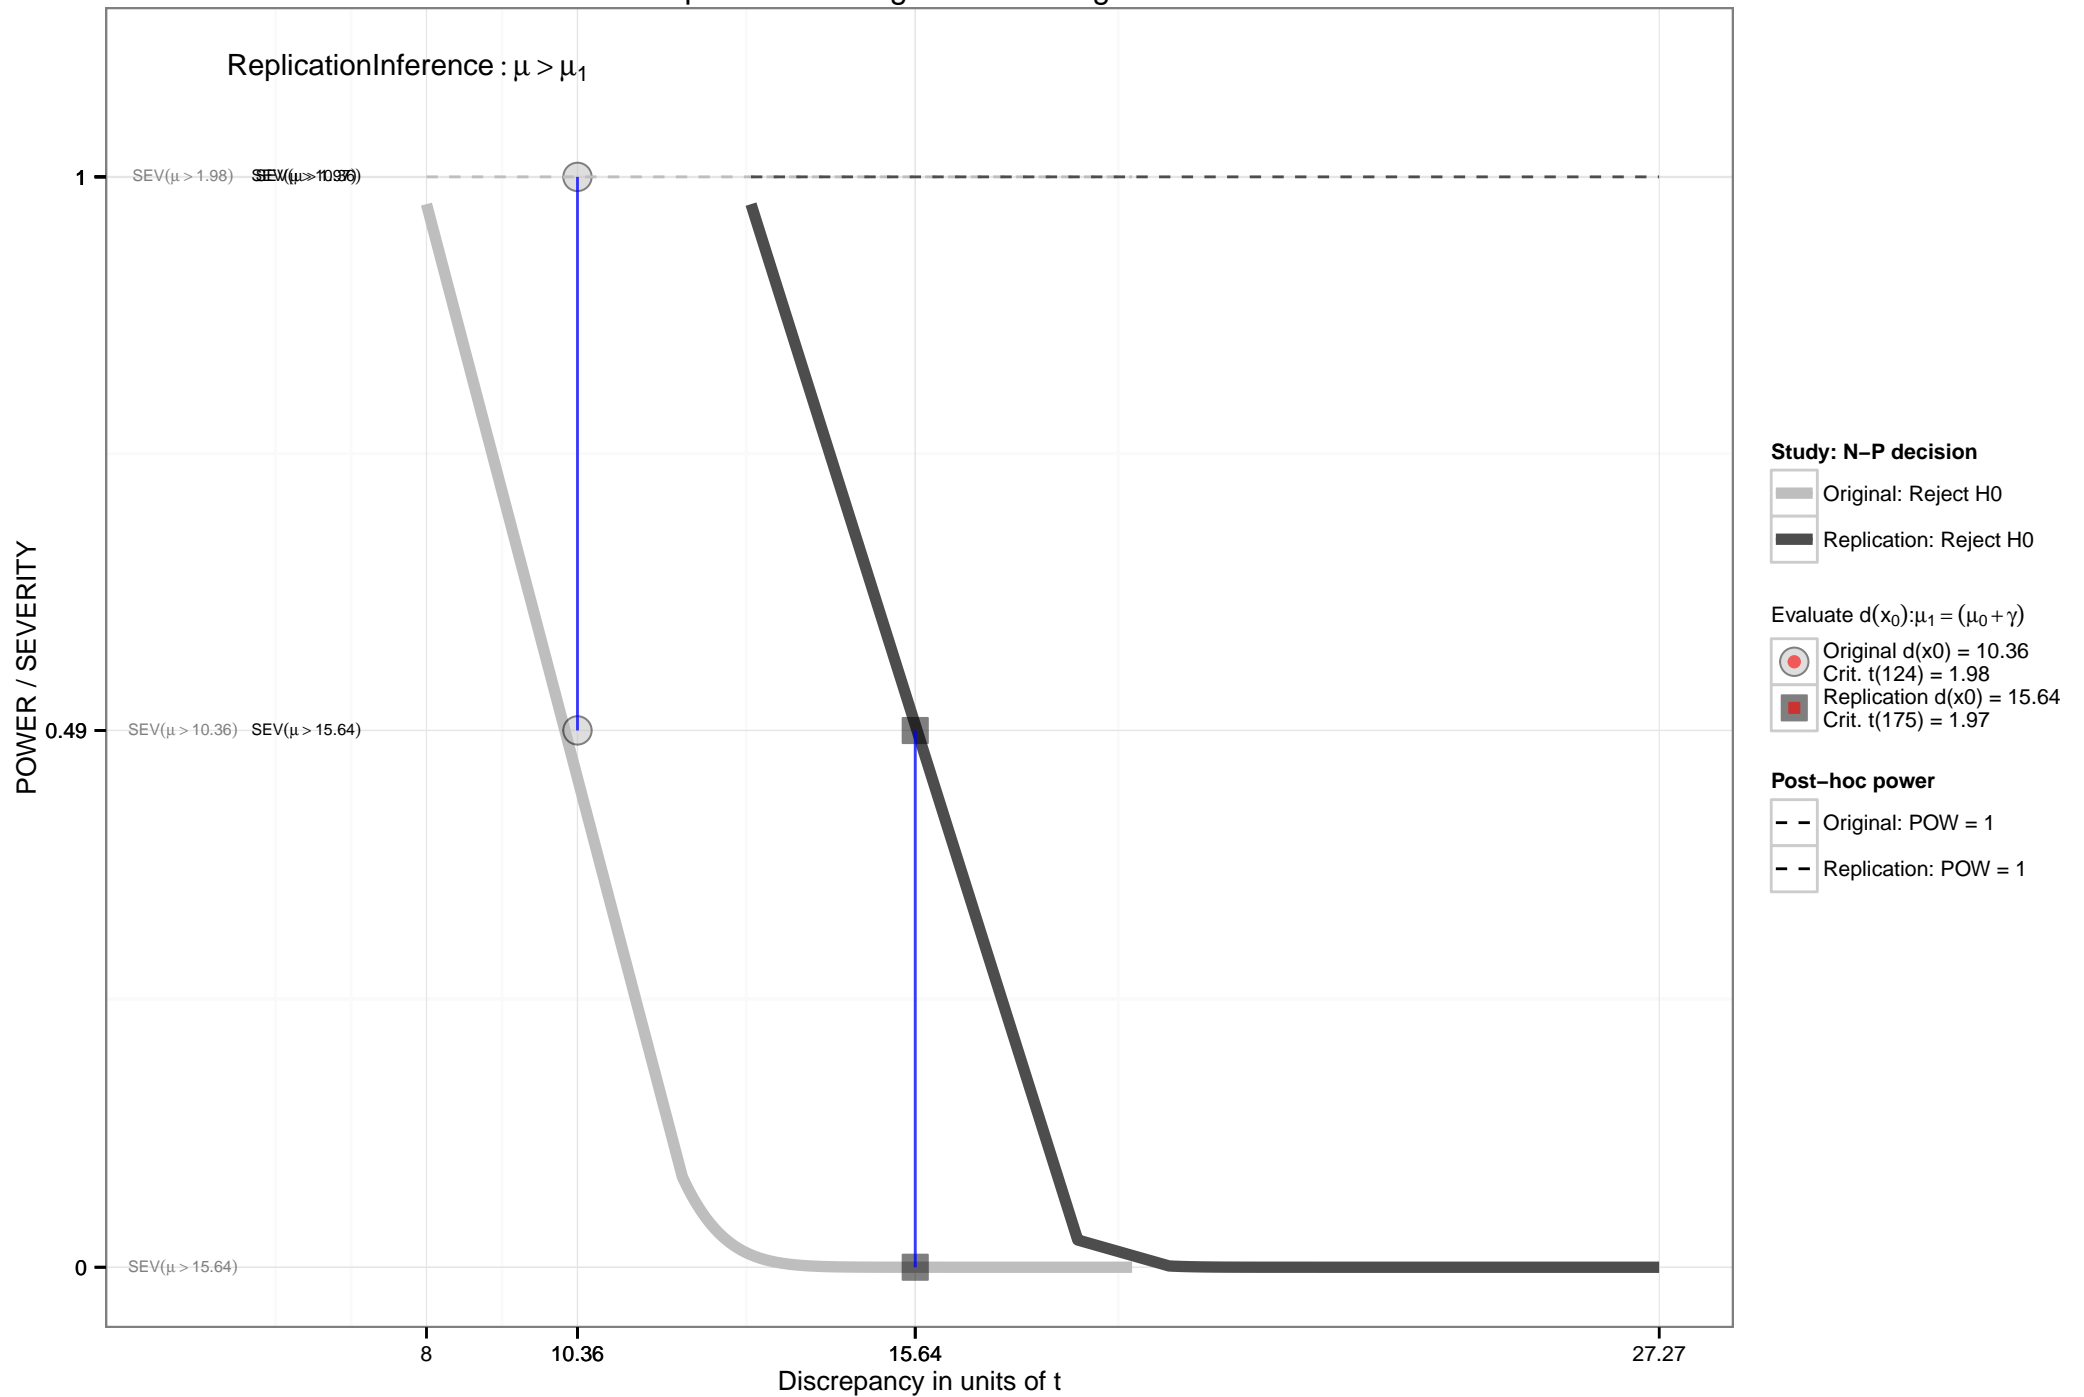

6 Multiple roles for time in short-term memory: Evidence from serial recall of order and timing.

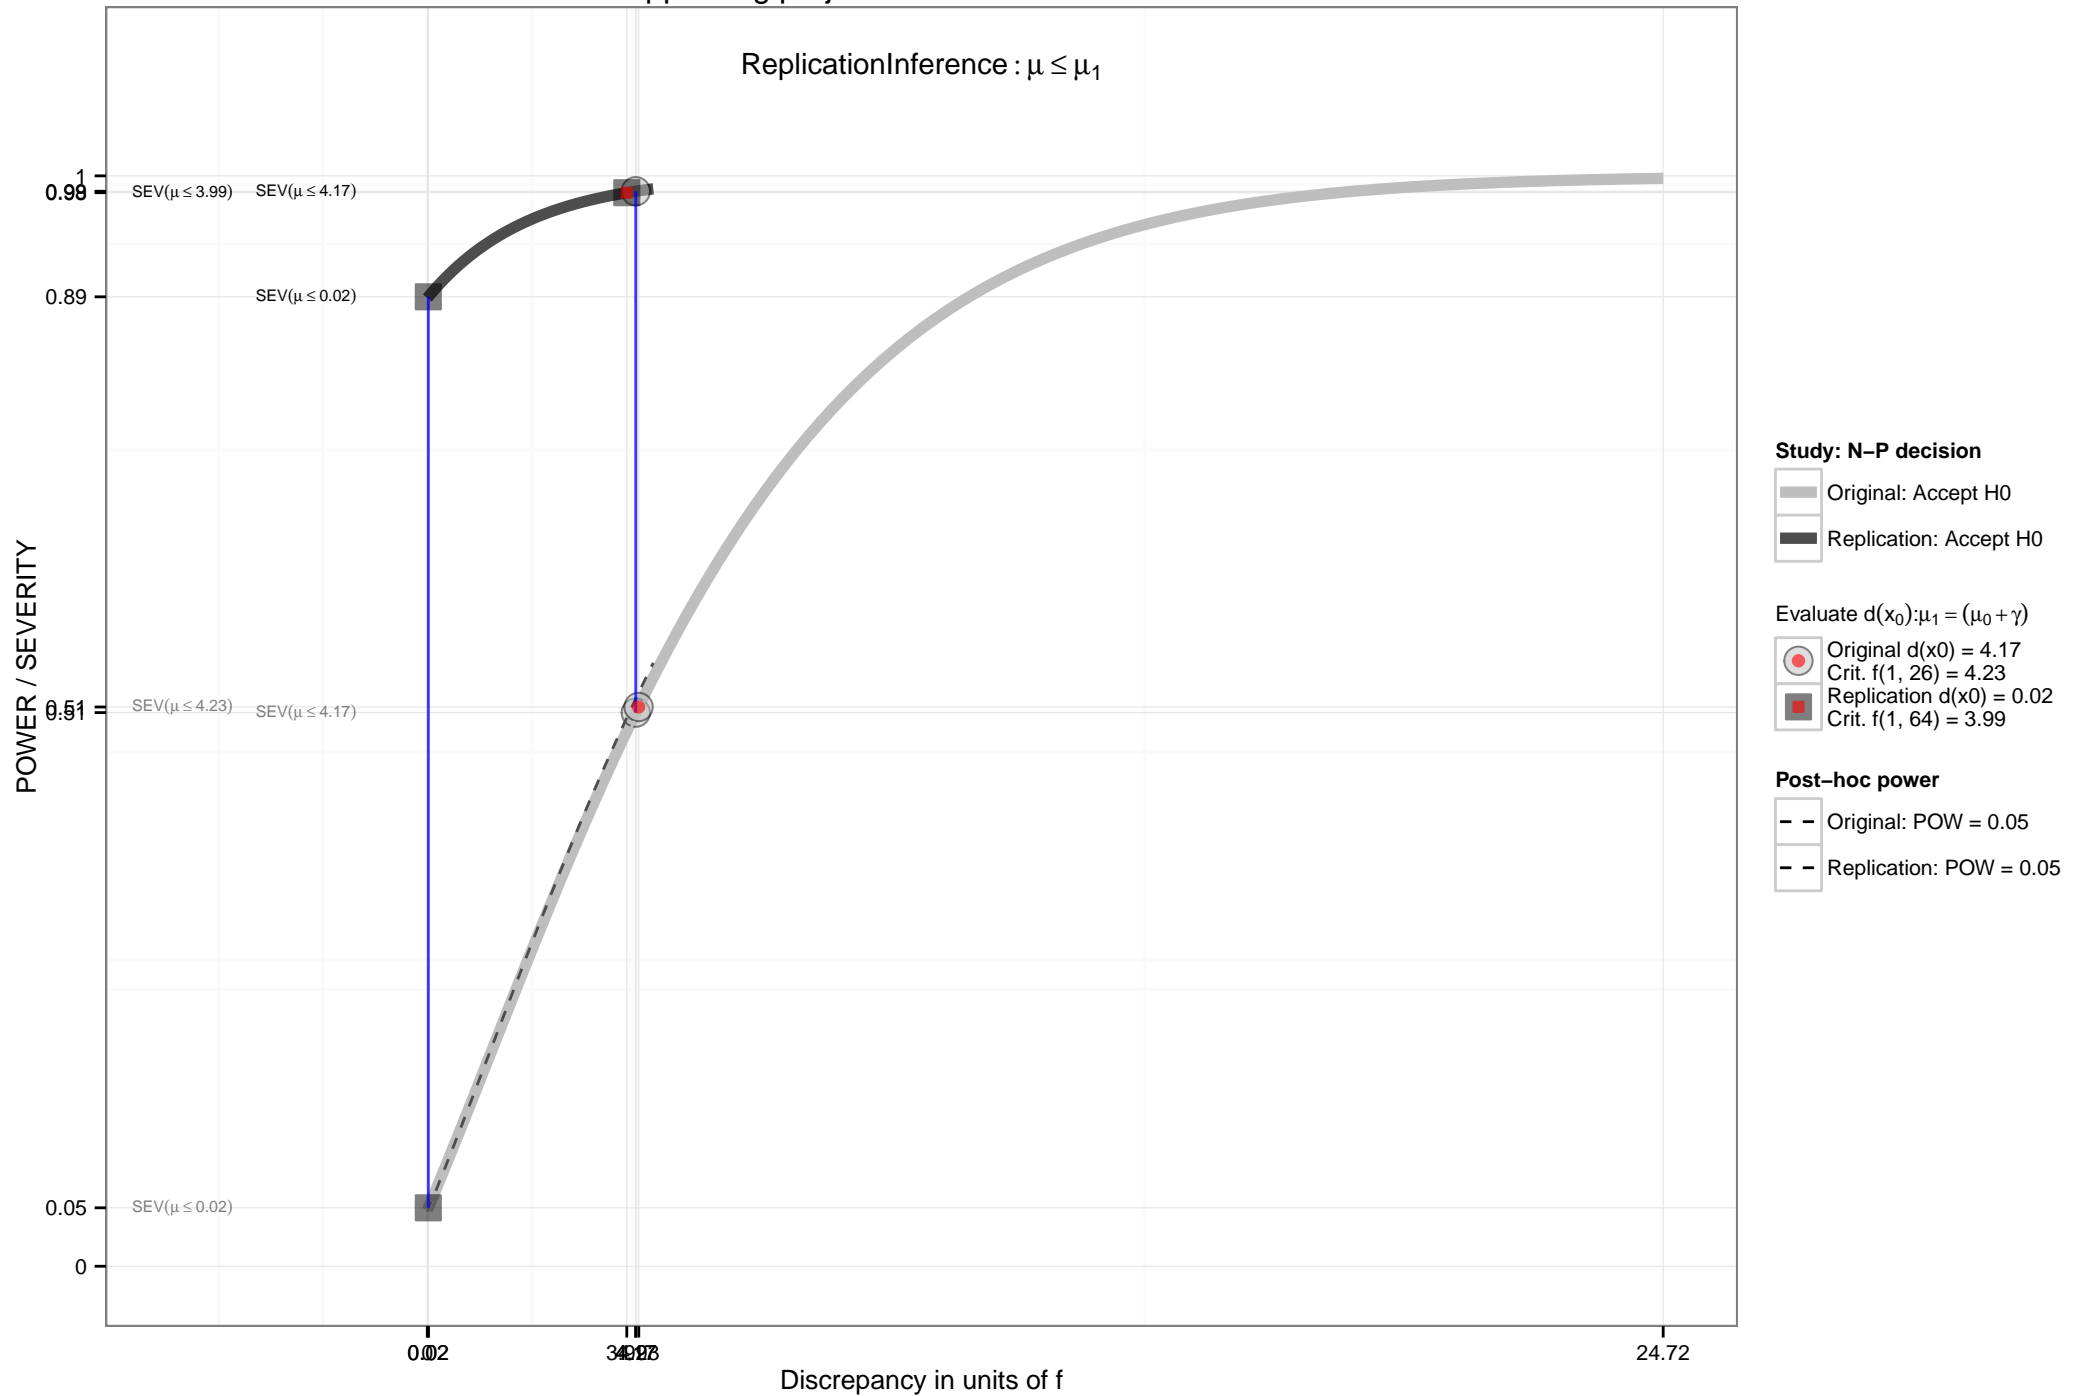

ReplicationInference : $\mu > \mu_1$

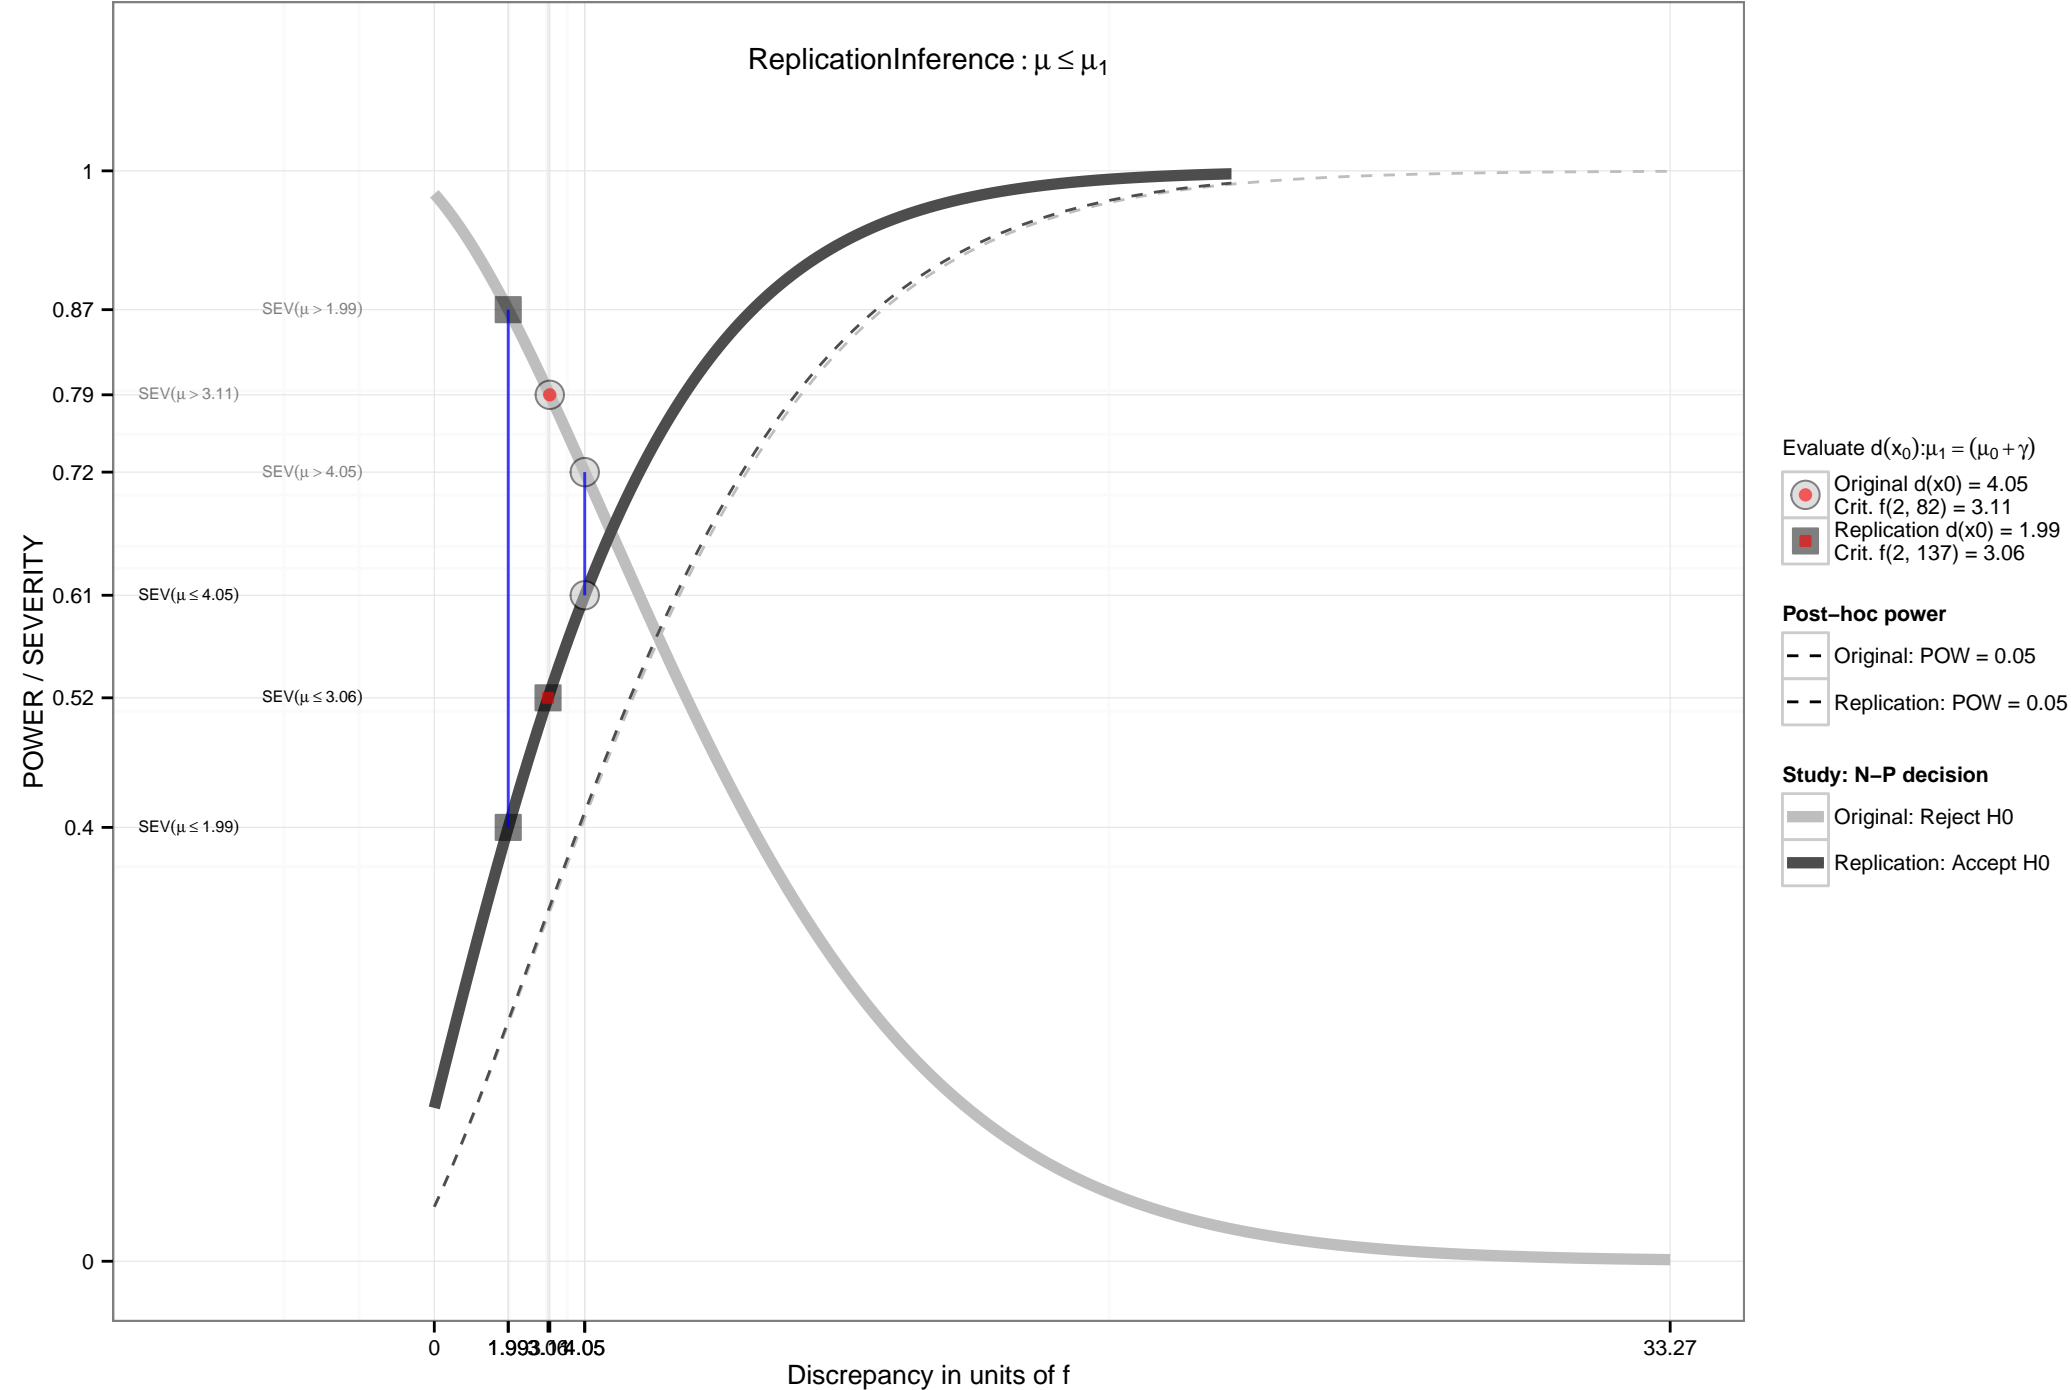

7 Prescribed optimism: Is it right to be wrong about the future?

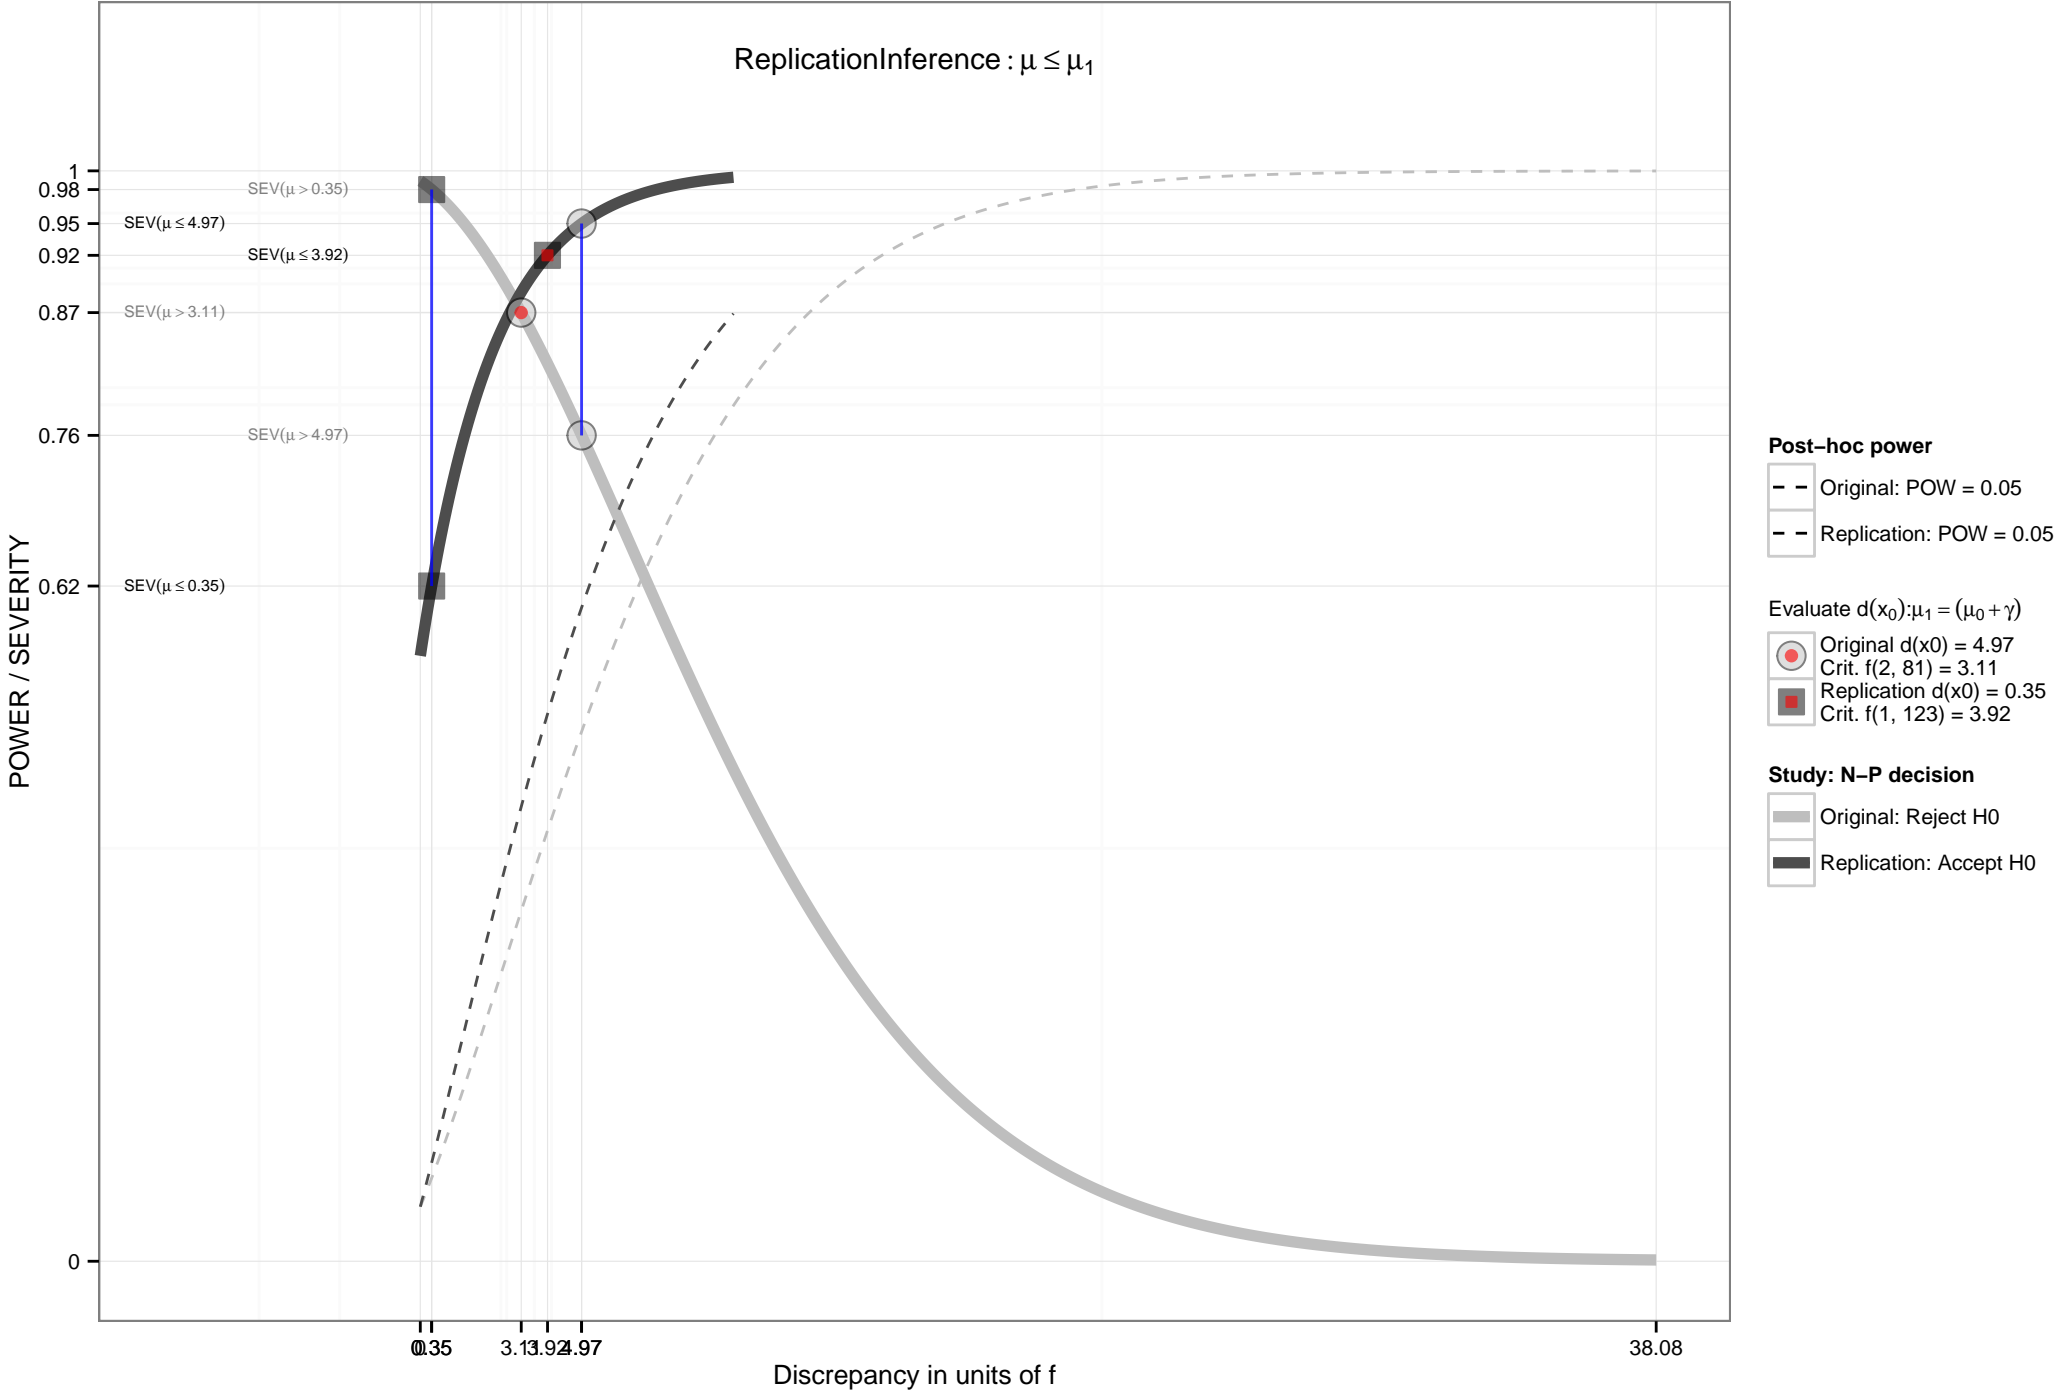

8 The threat of appearing prejudiced and race-based attentional biases.

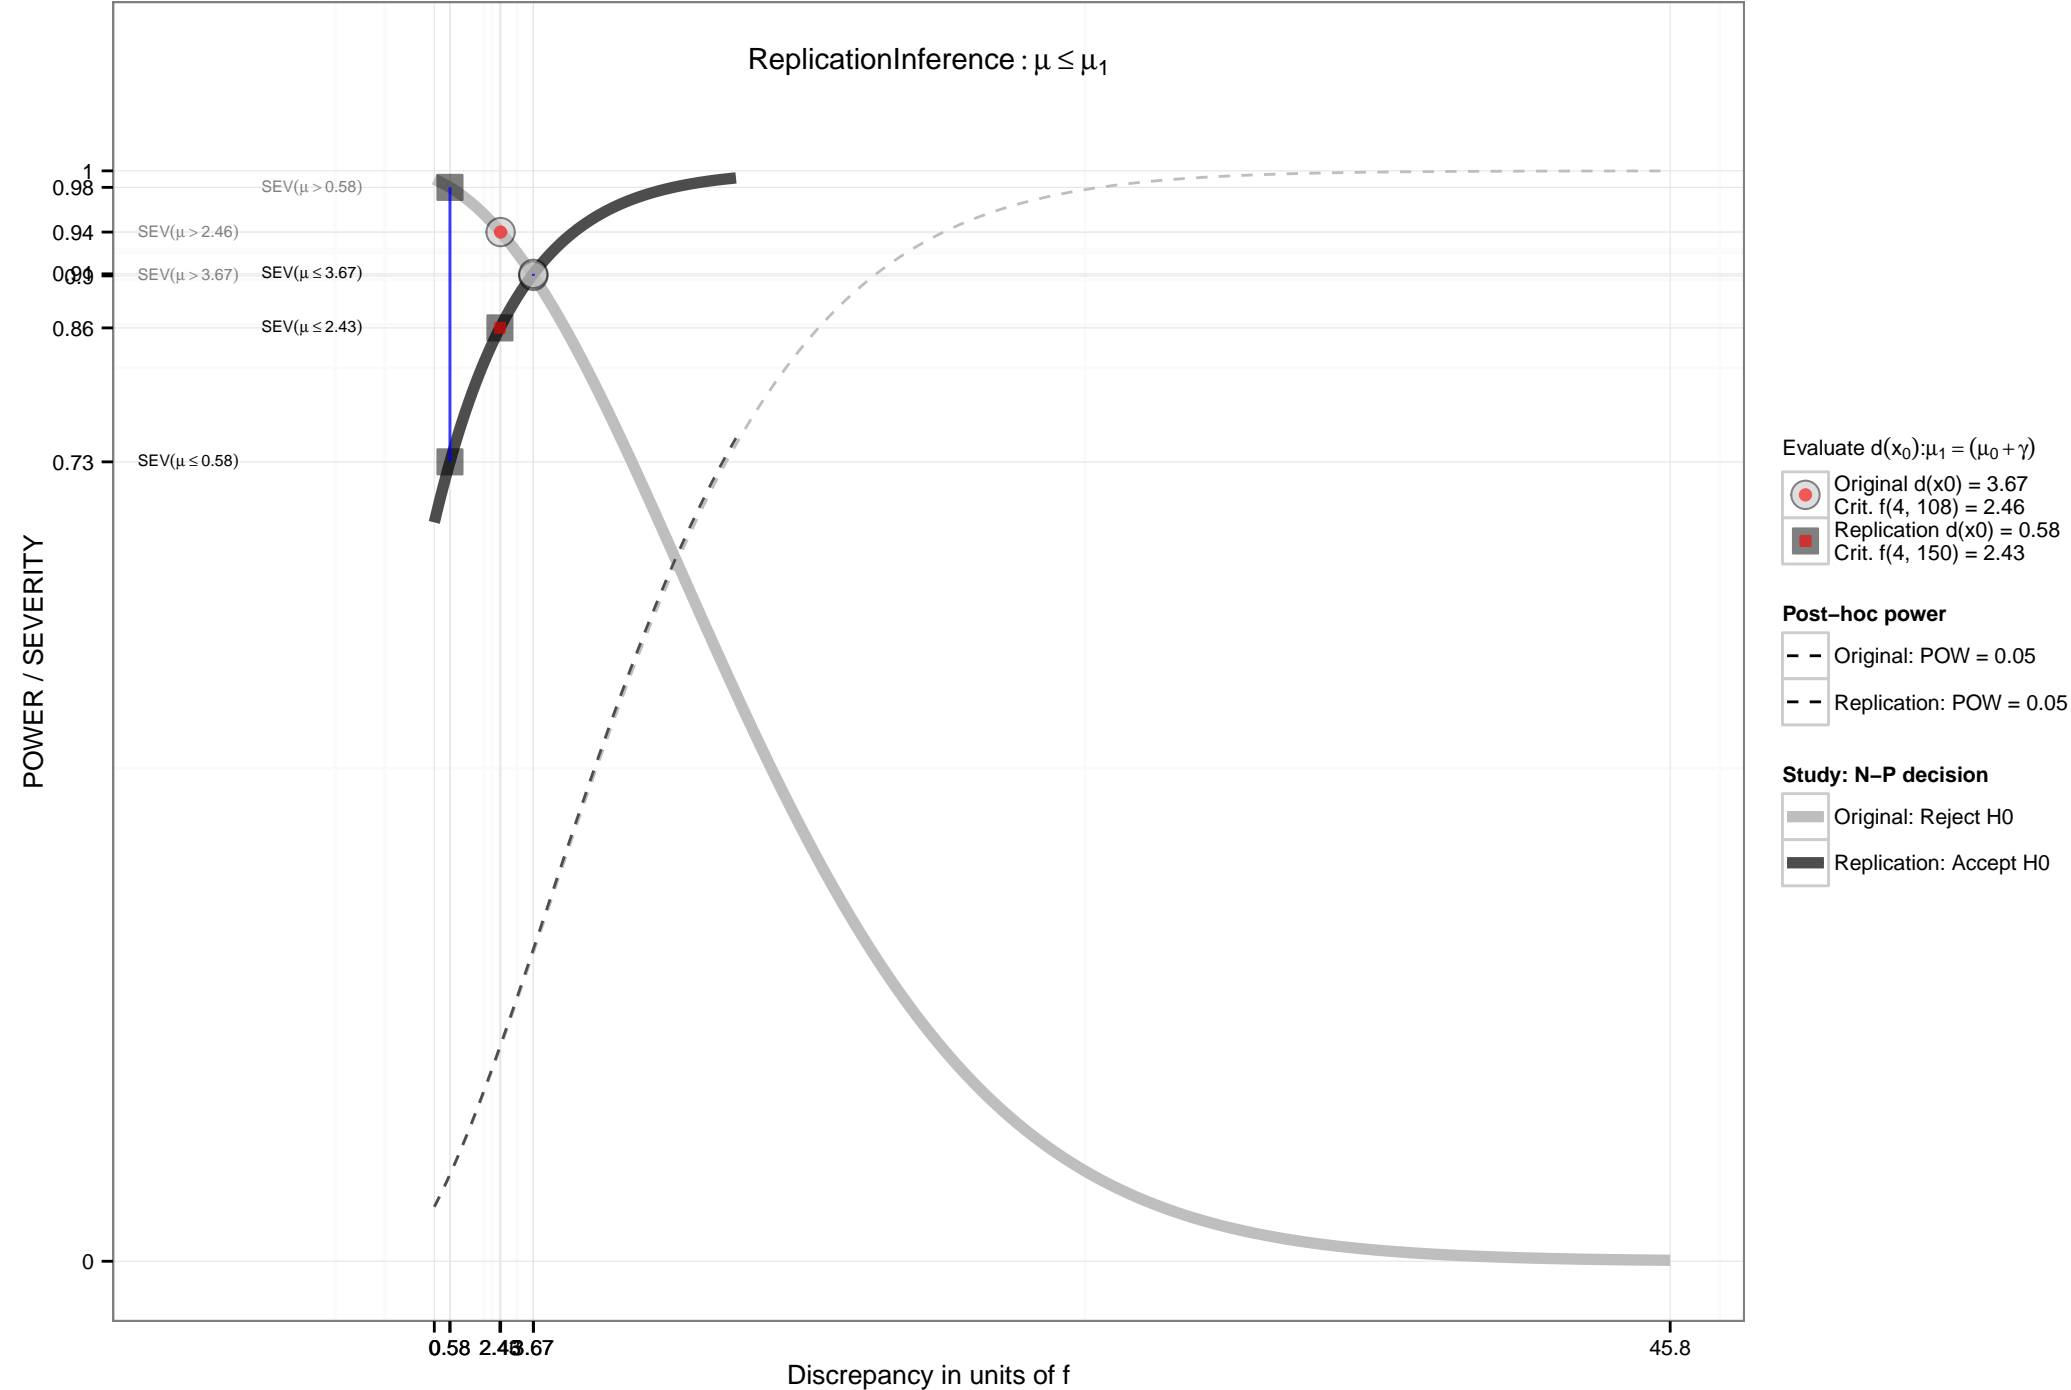

9 Self-regulation and selective exposure: The impact of depleted self-regulation resources on confirmatory information processing.

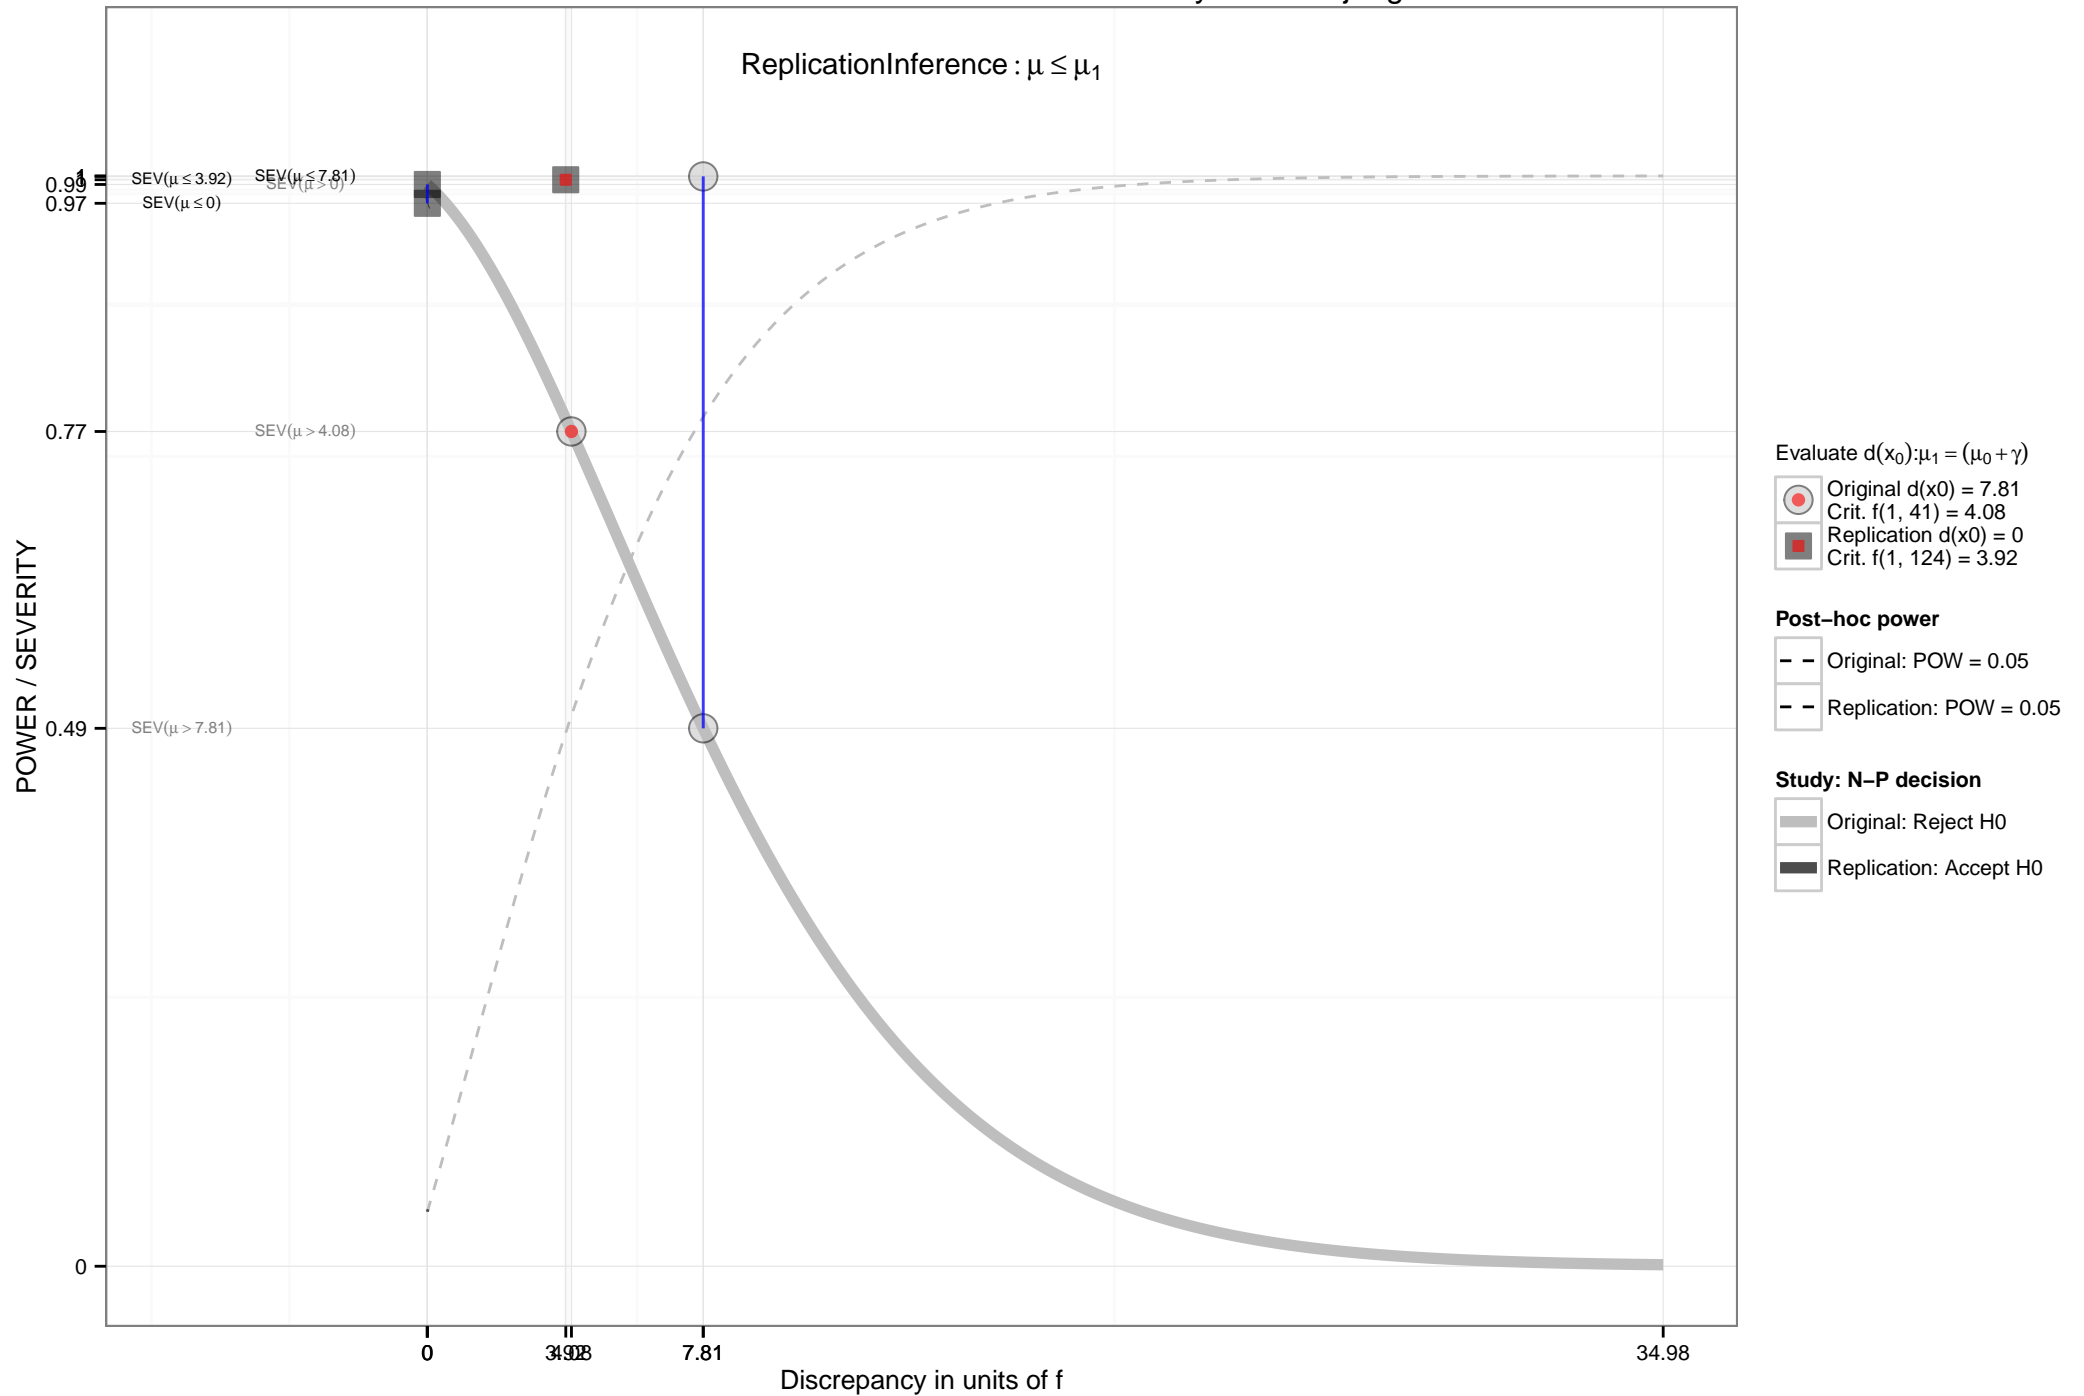

10 Keeping one's distance: The influence of spatial distance cues on affect and evaluation.

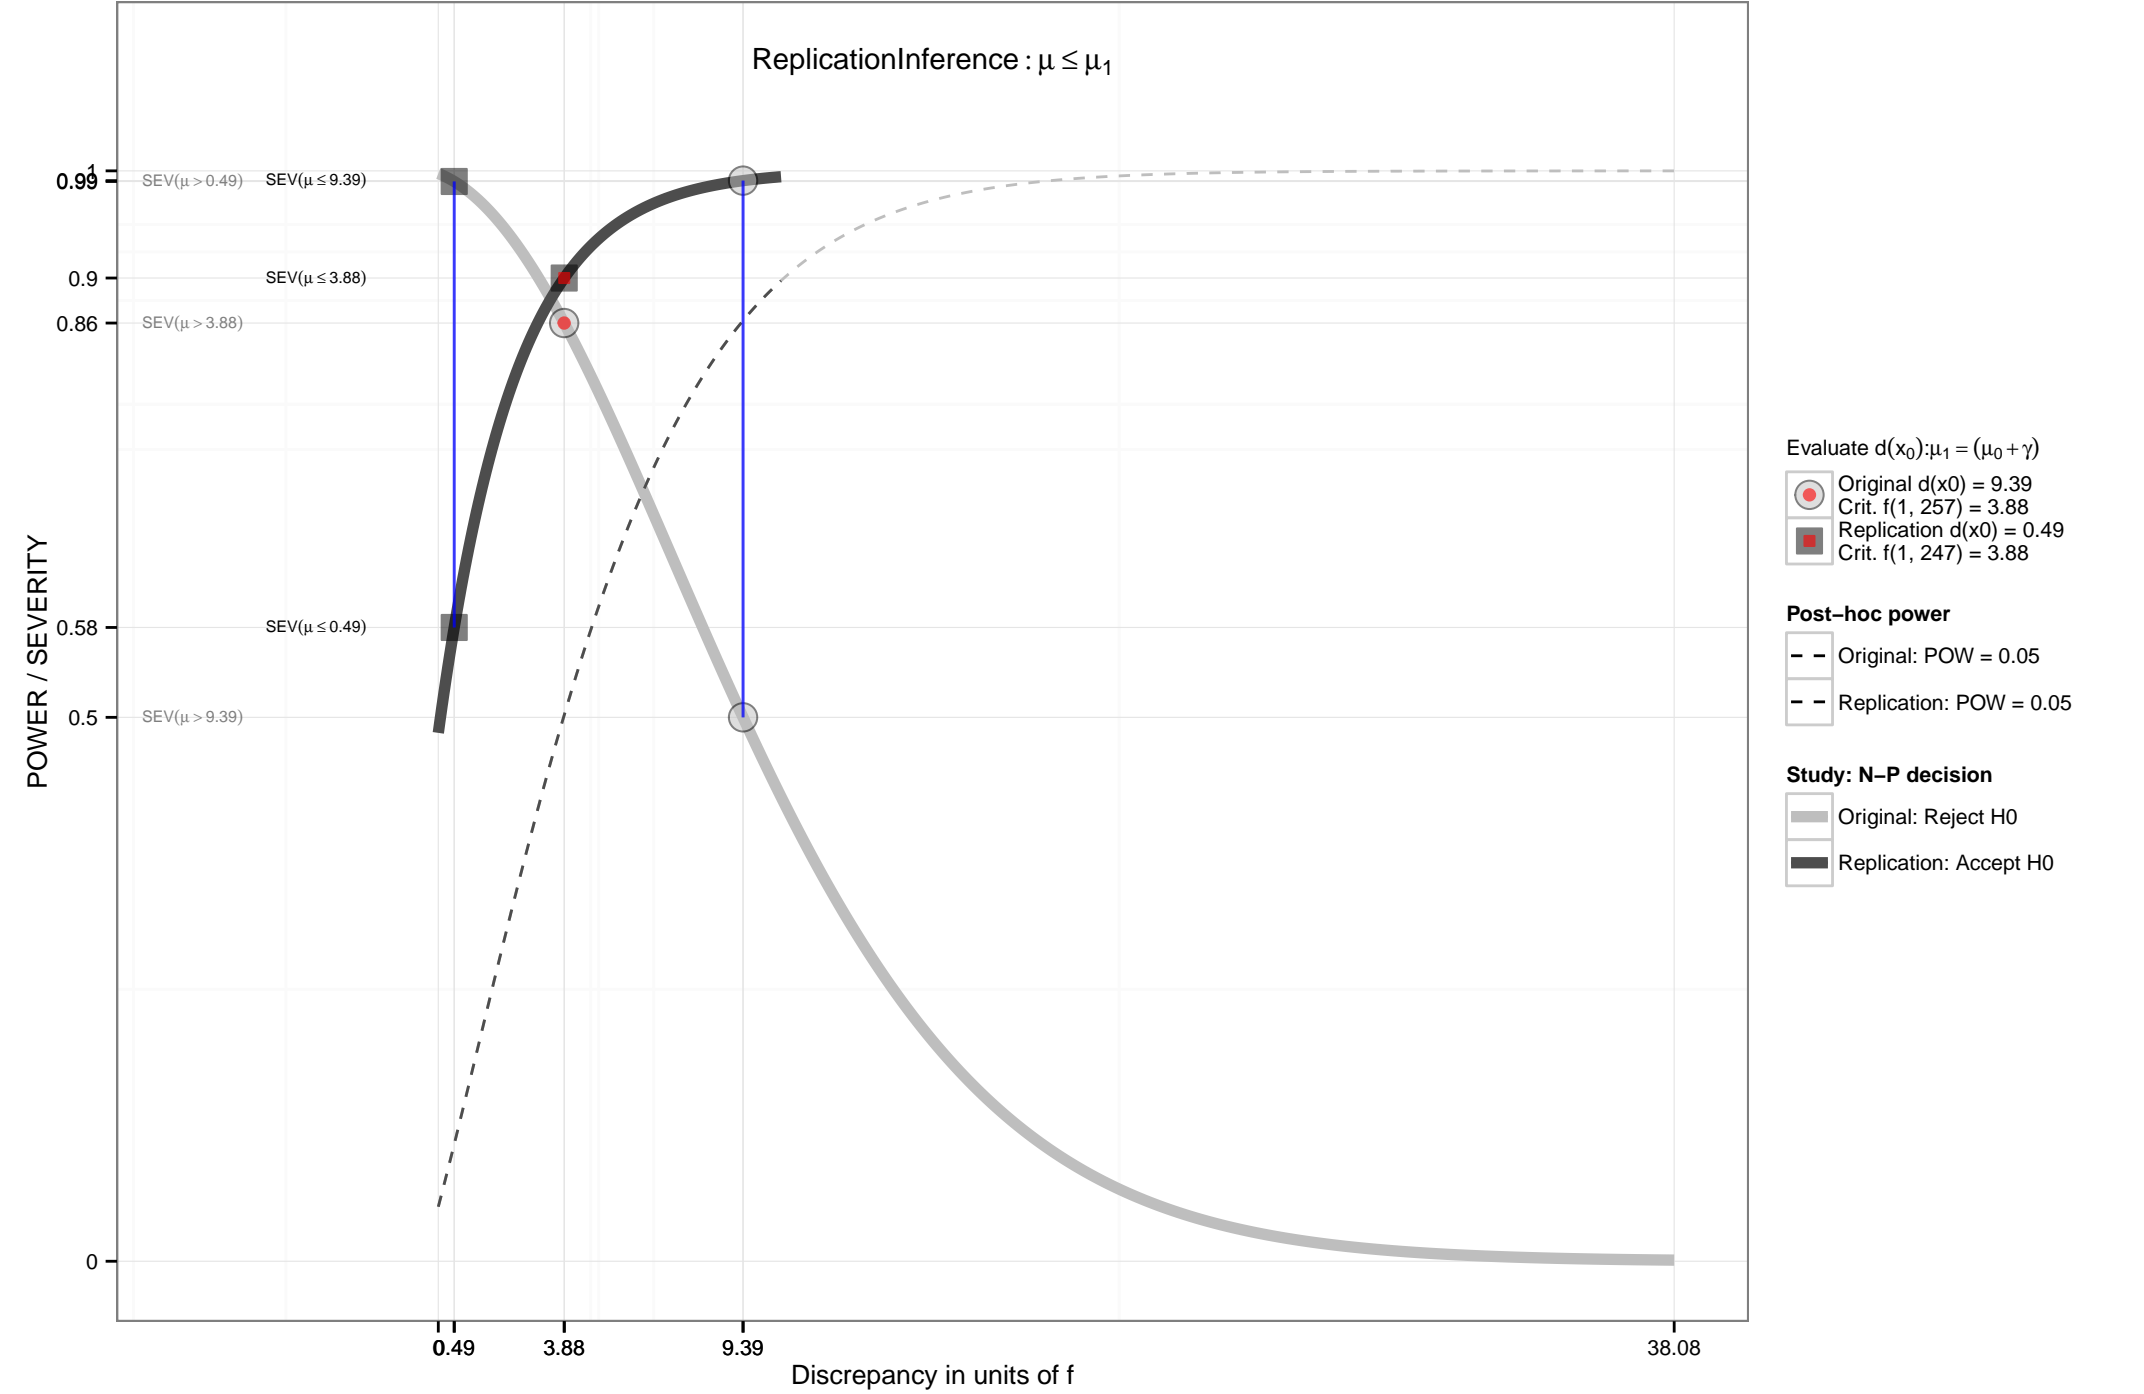

11 Creating social connection through inferential reproduction: Loneliness and perceived agency in gadgets, gods, and greyhounds.

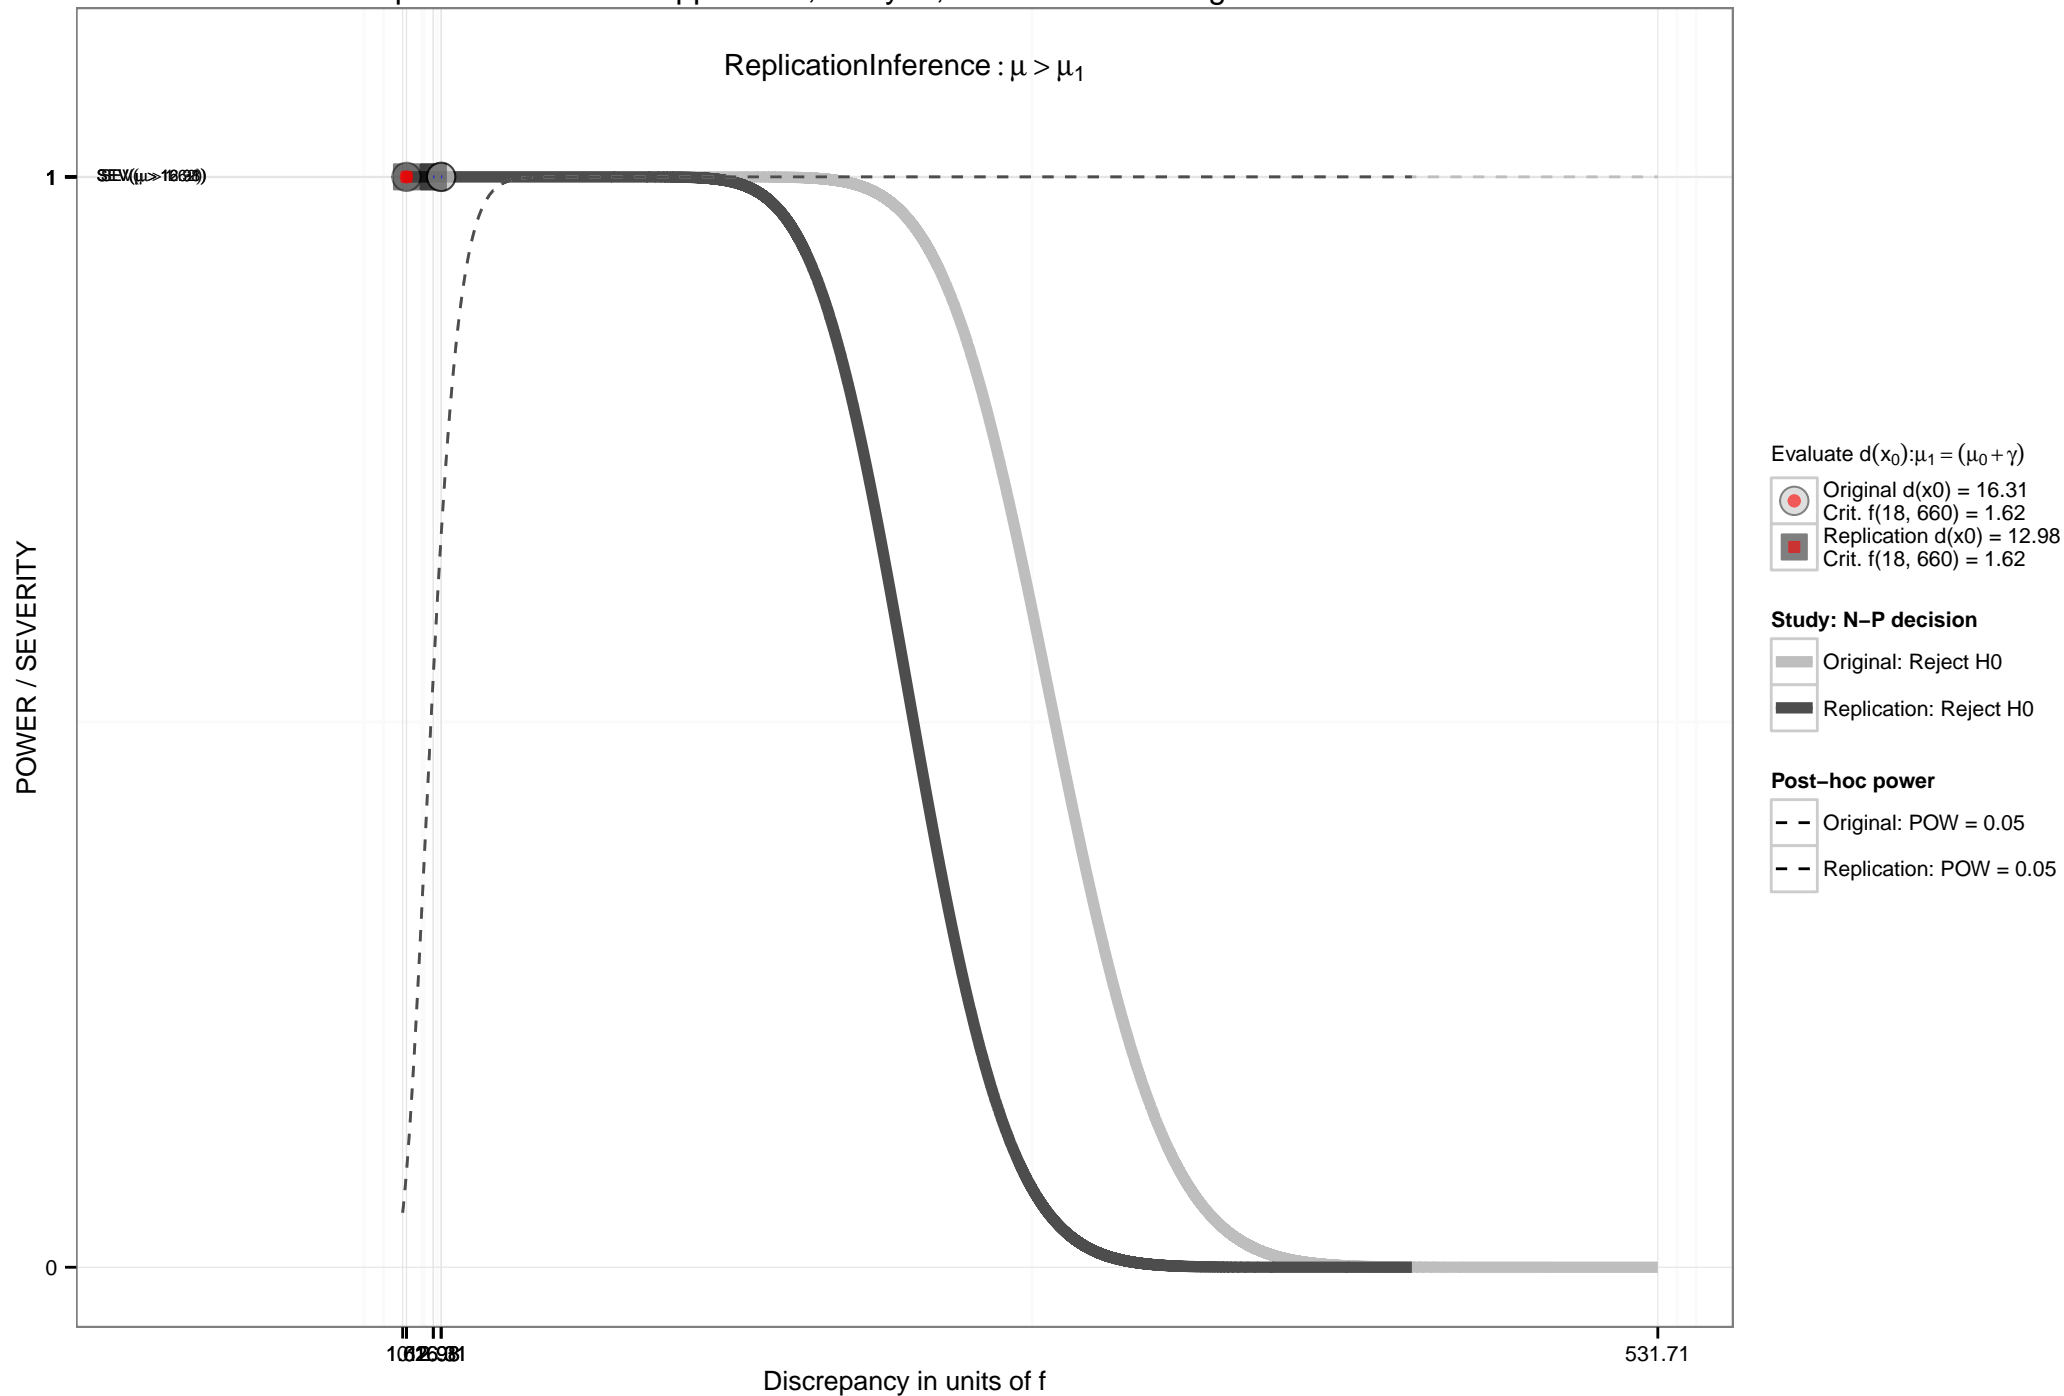

12 With a clean conscience: Cleanliness reduces the severity of moral judgments.

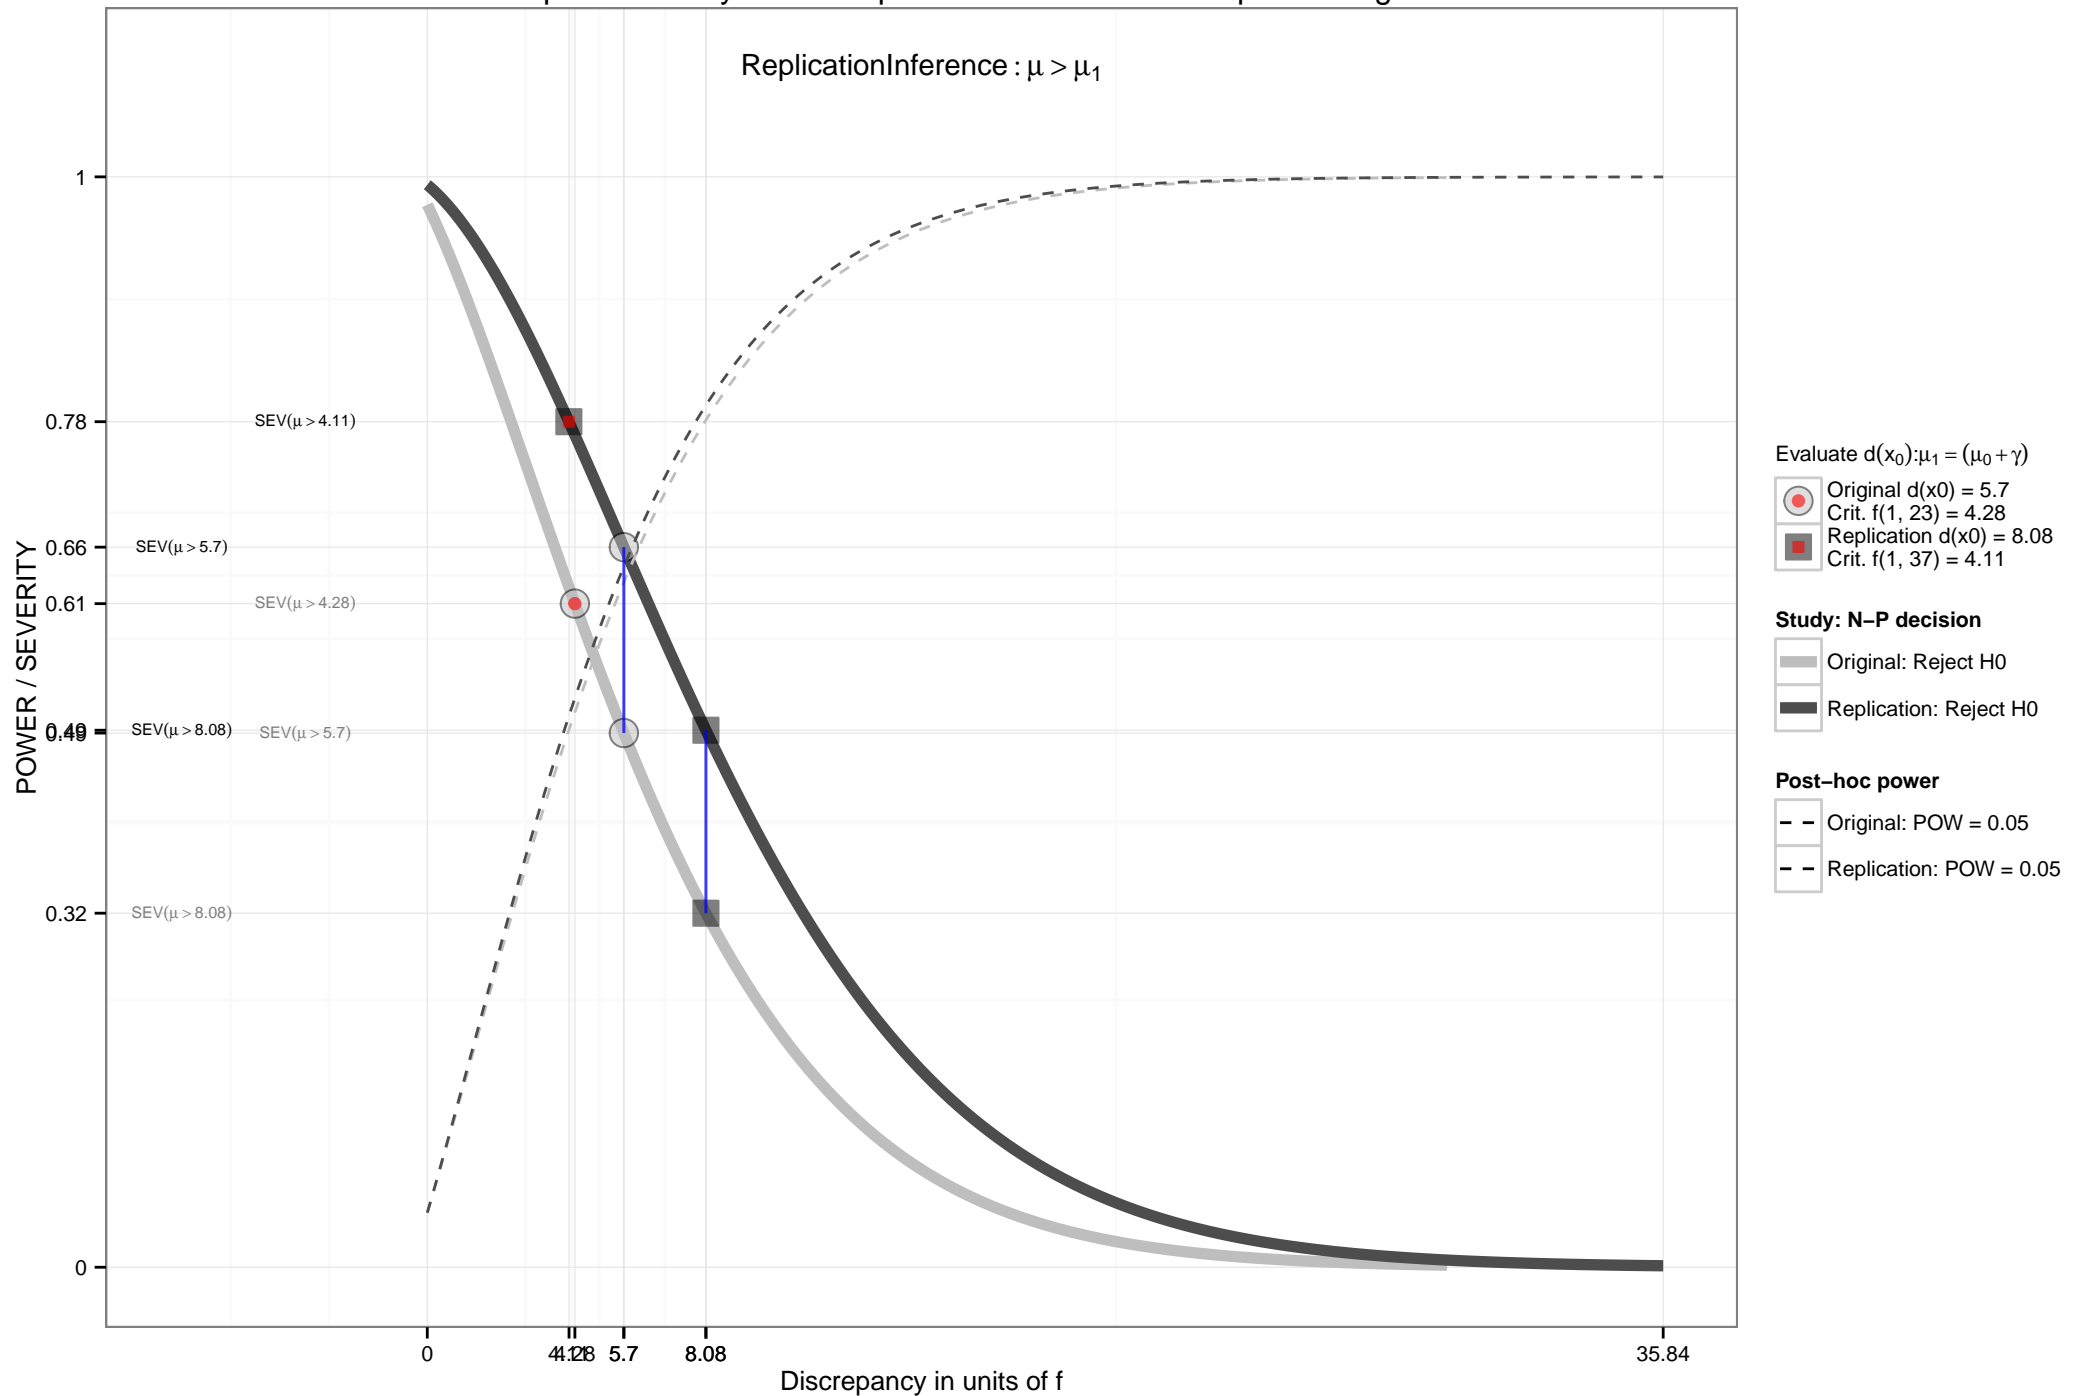

aning the mind to close it: Considering a message in light of important values increases message processing and later resistance to change.

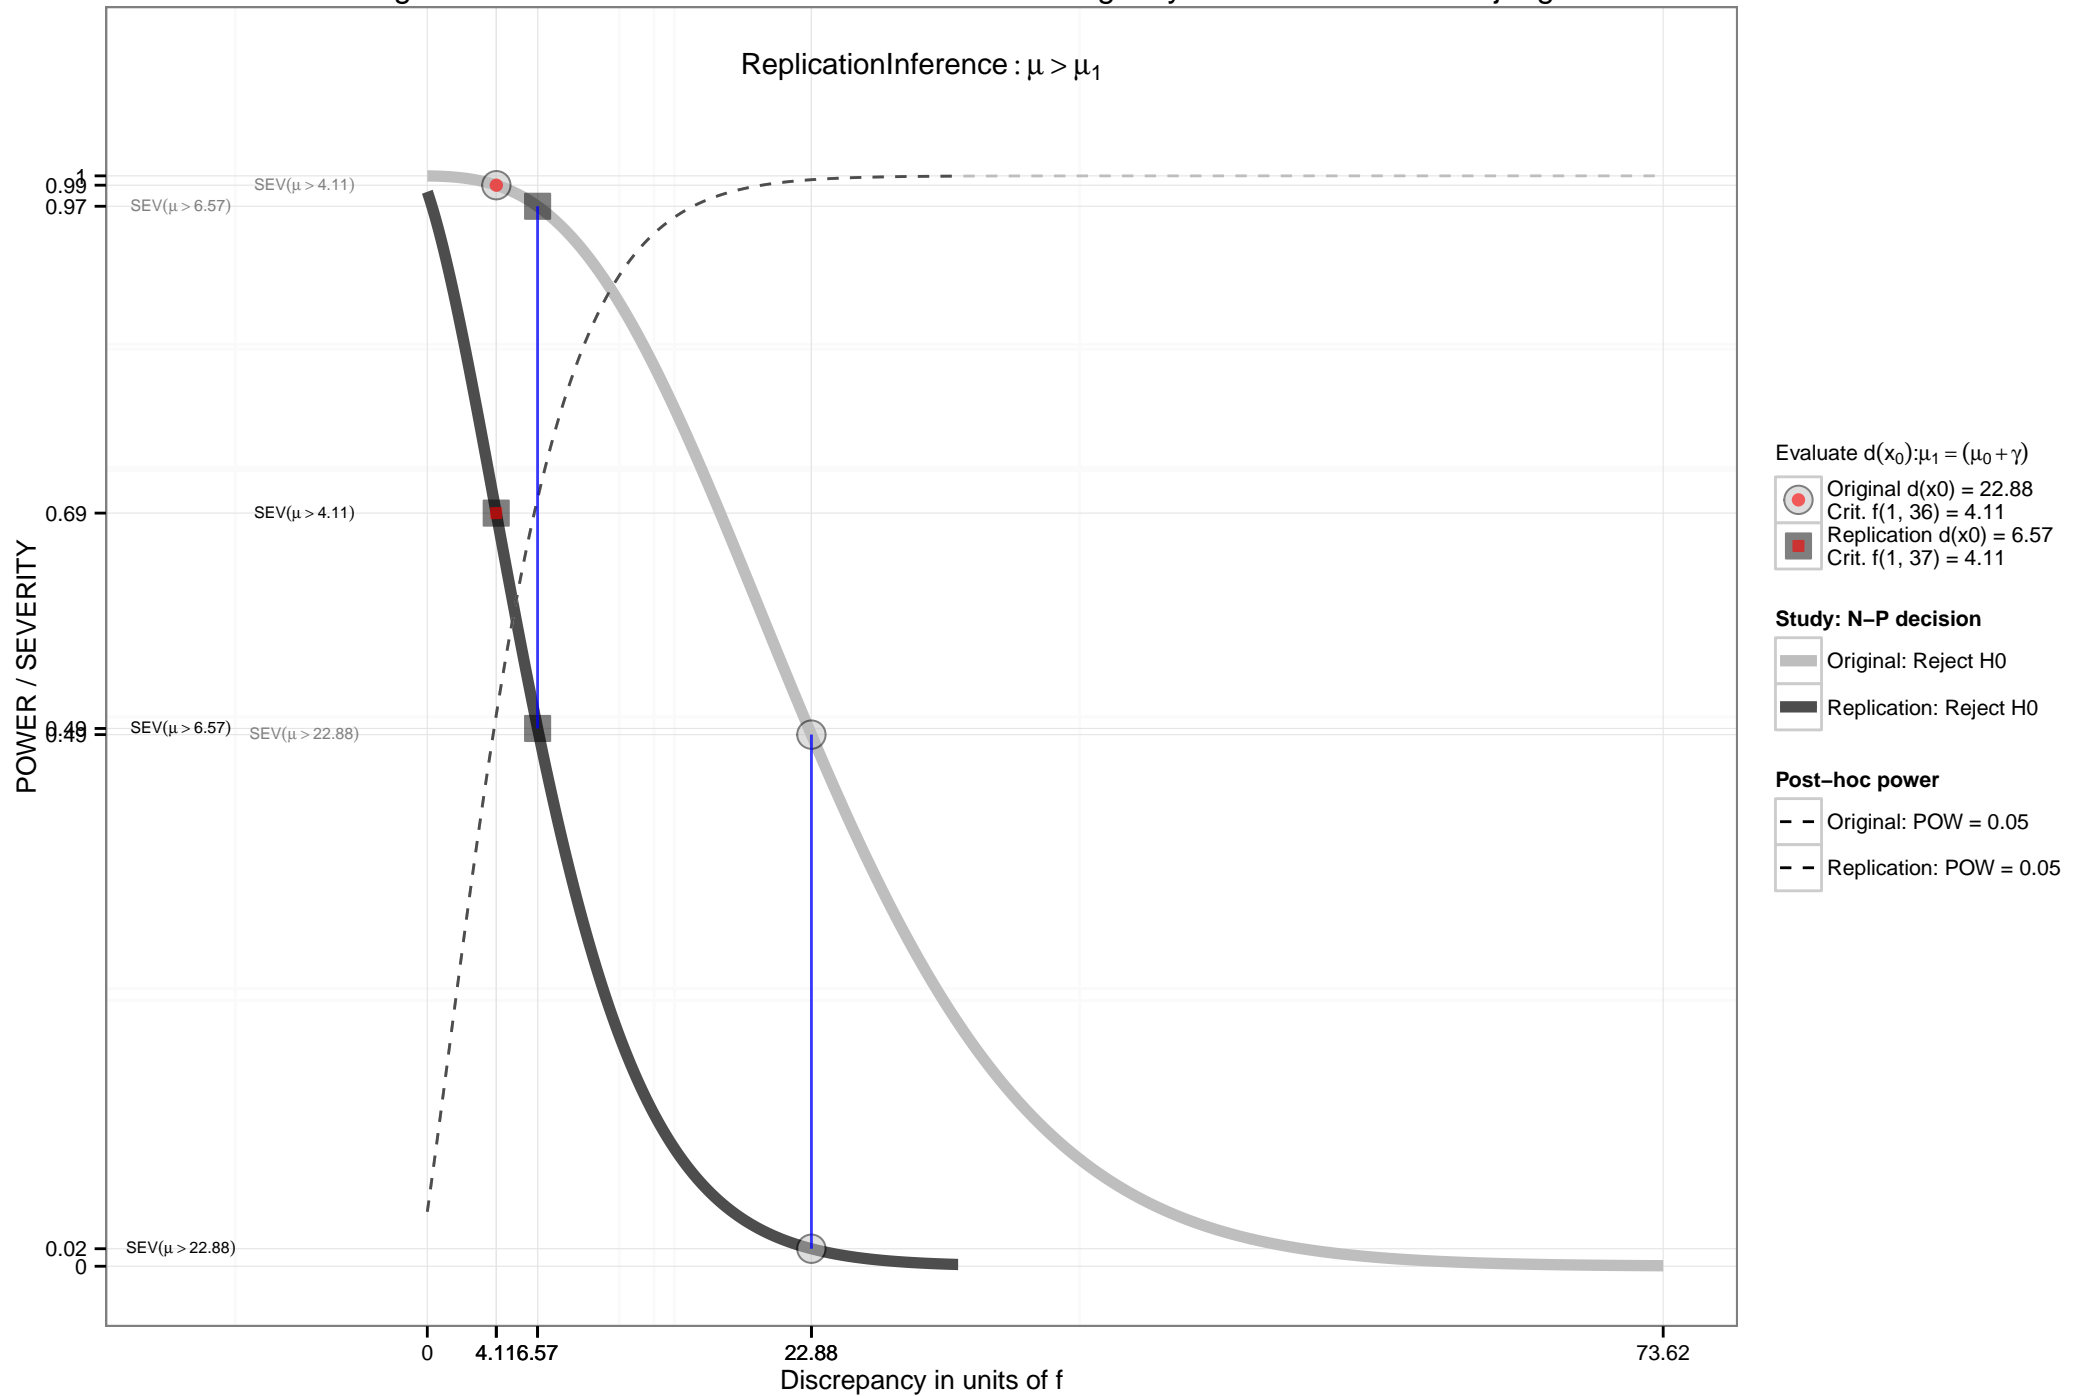

14 Temporal selection is suppressed, delayed, and diffused during the attentional blink.

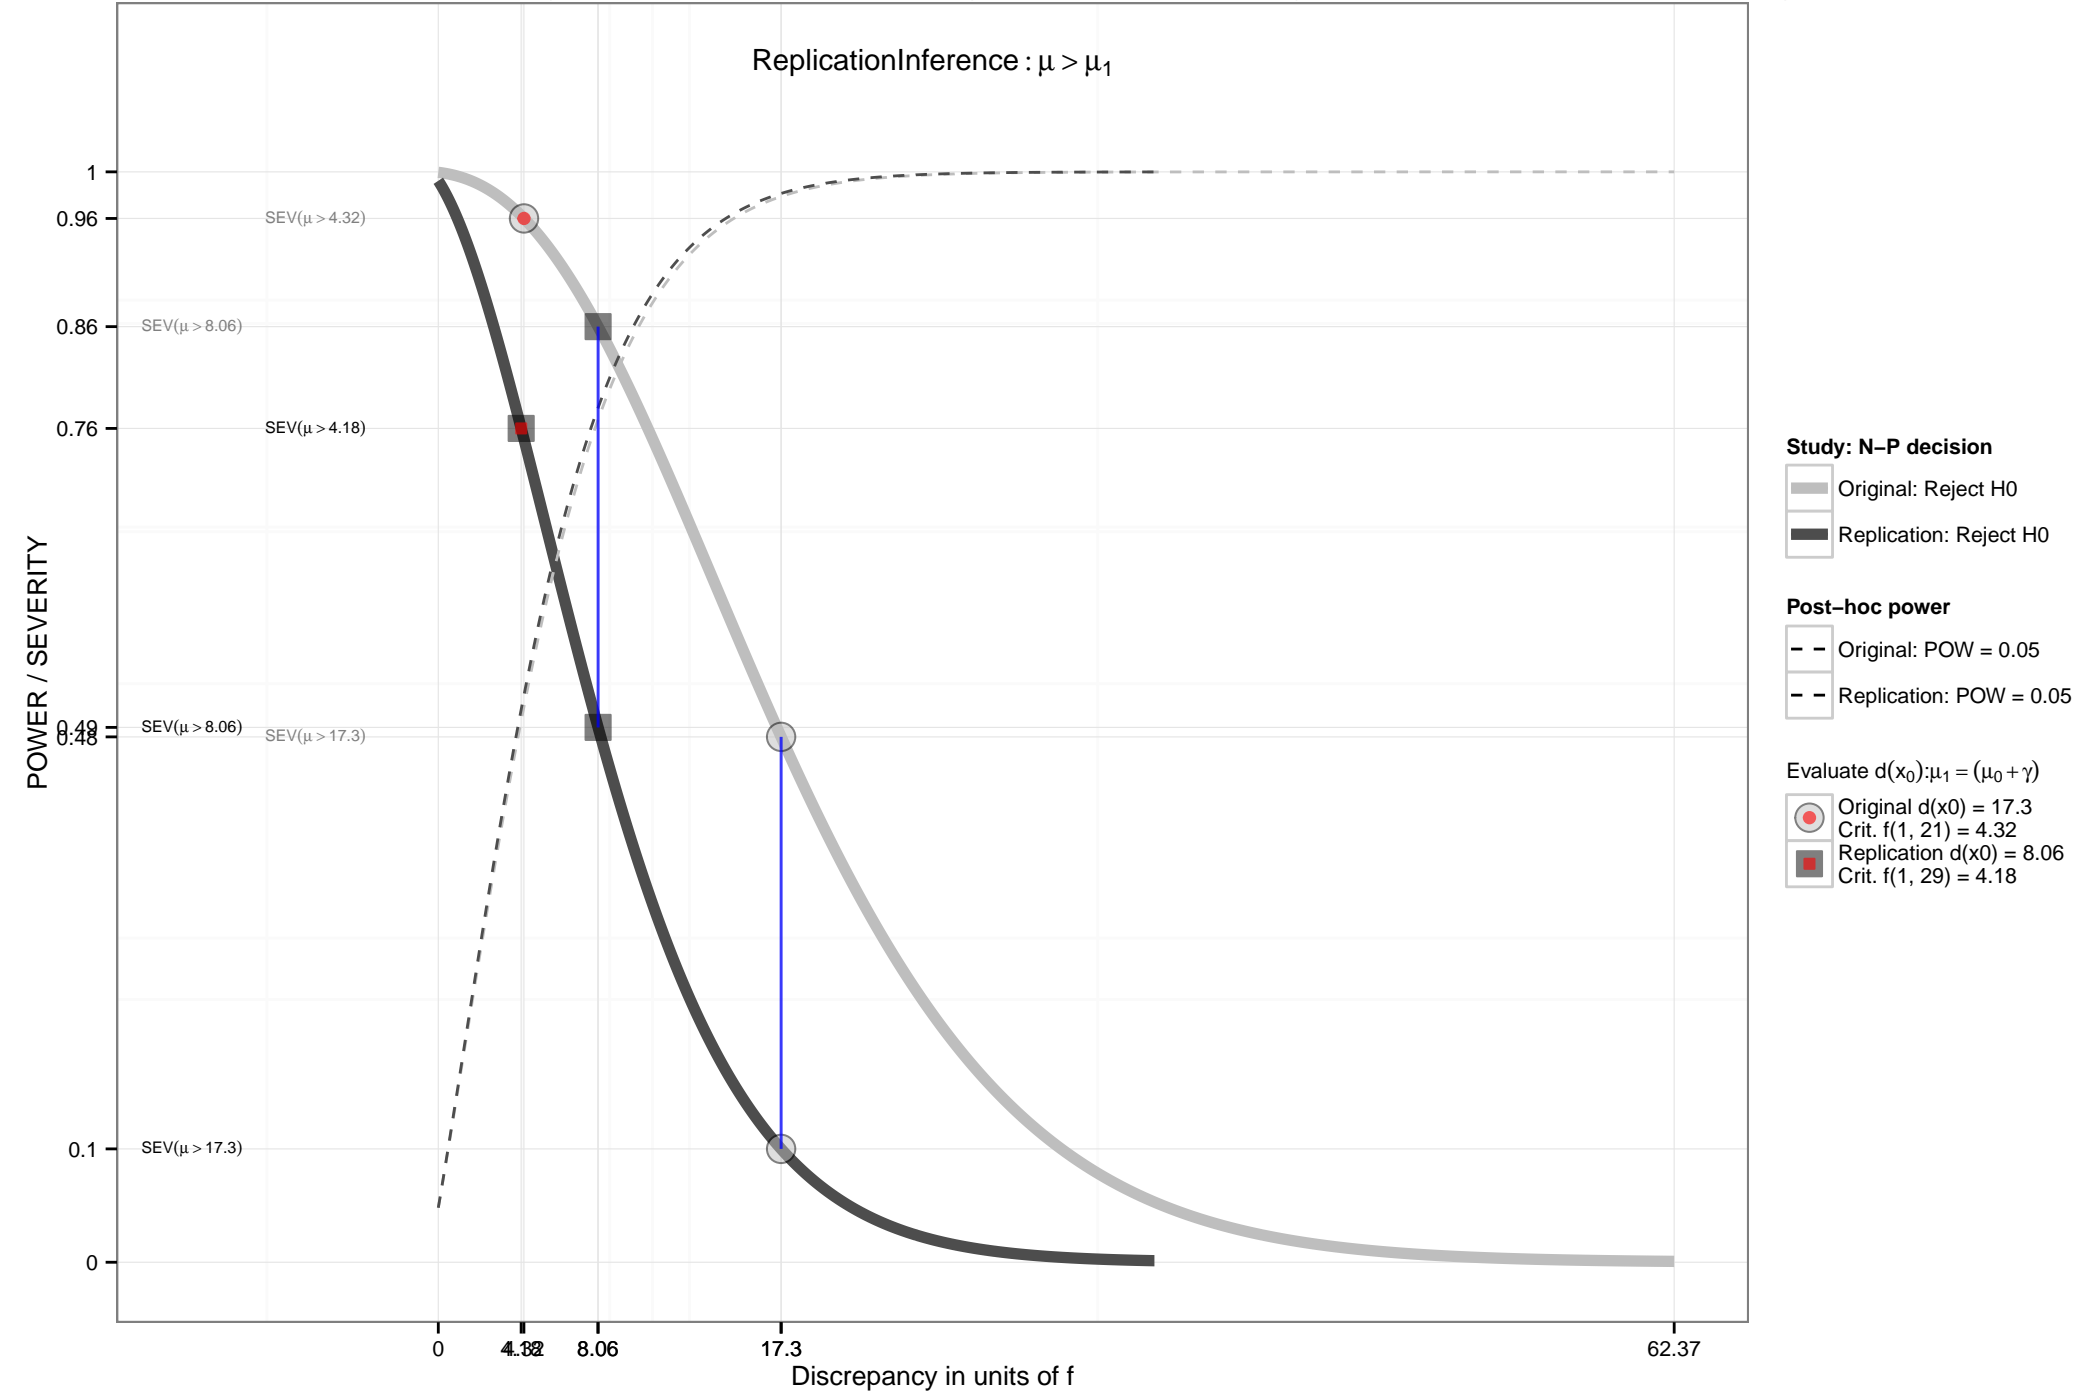

15 Adaptive memory: The comparative value of survival processing.

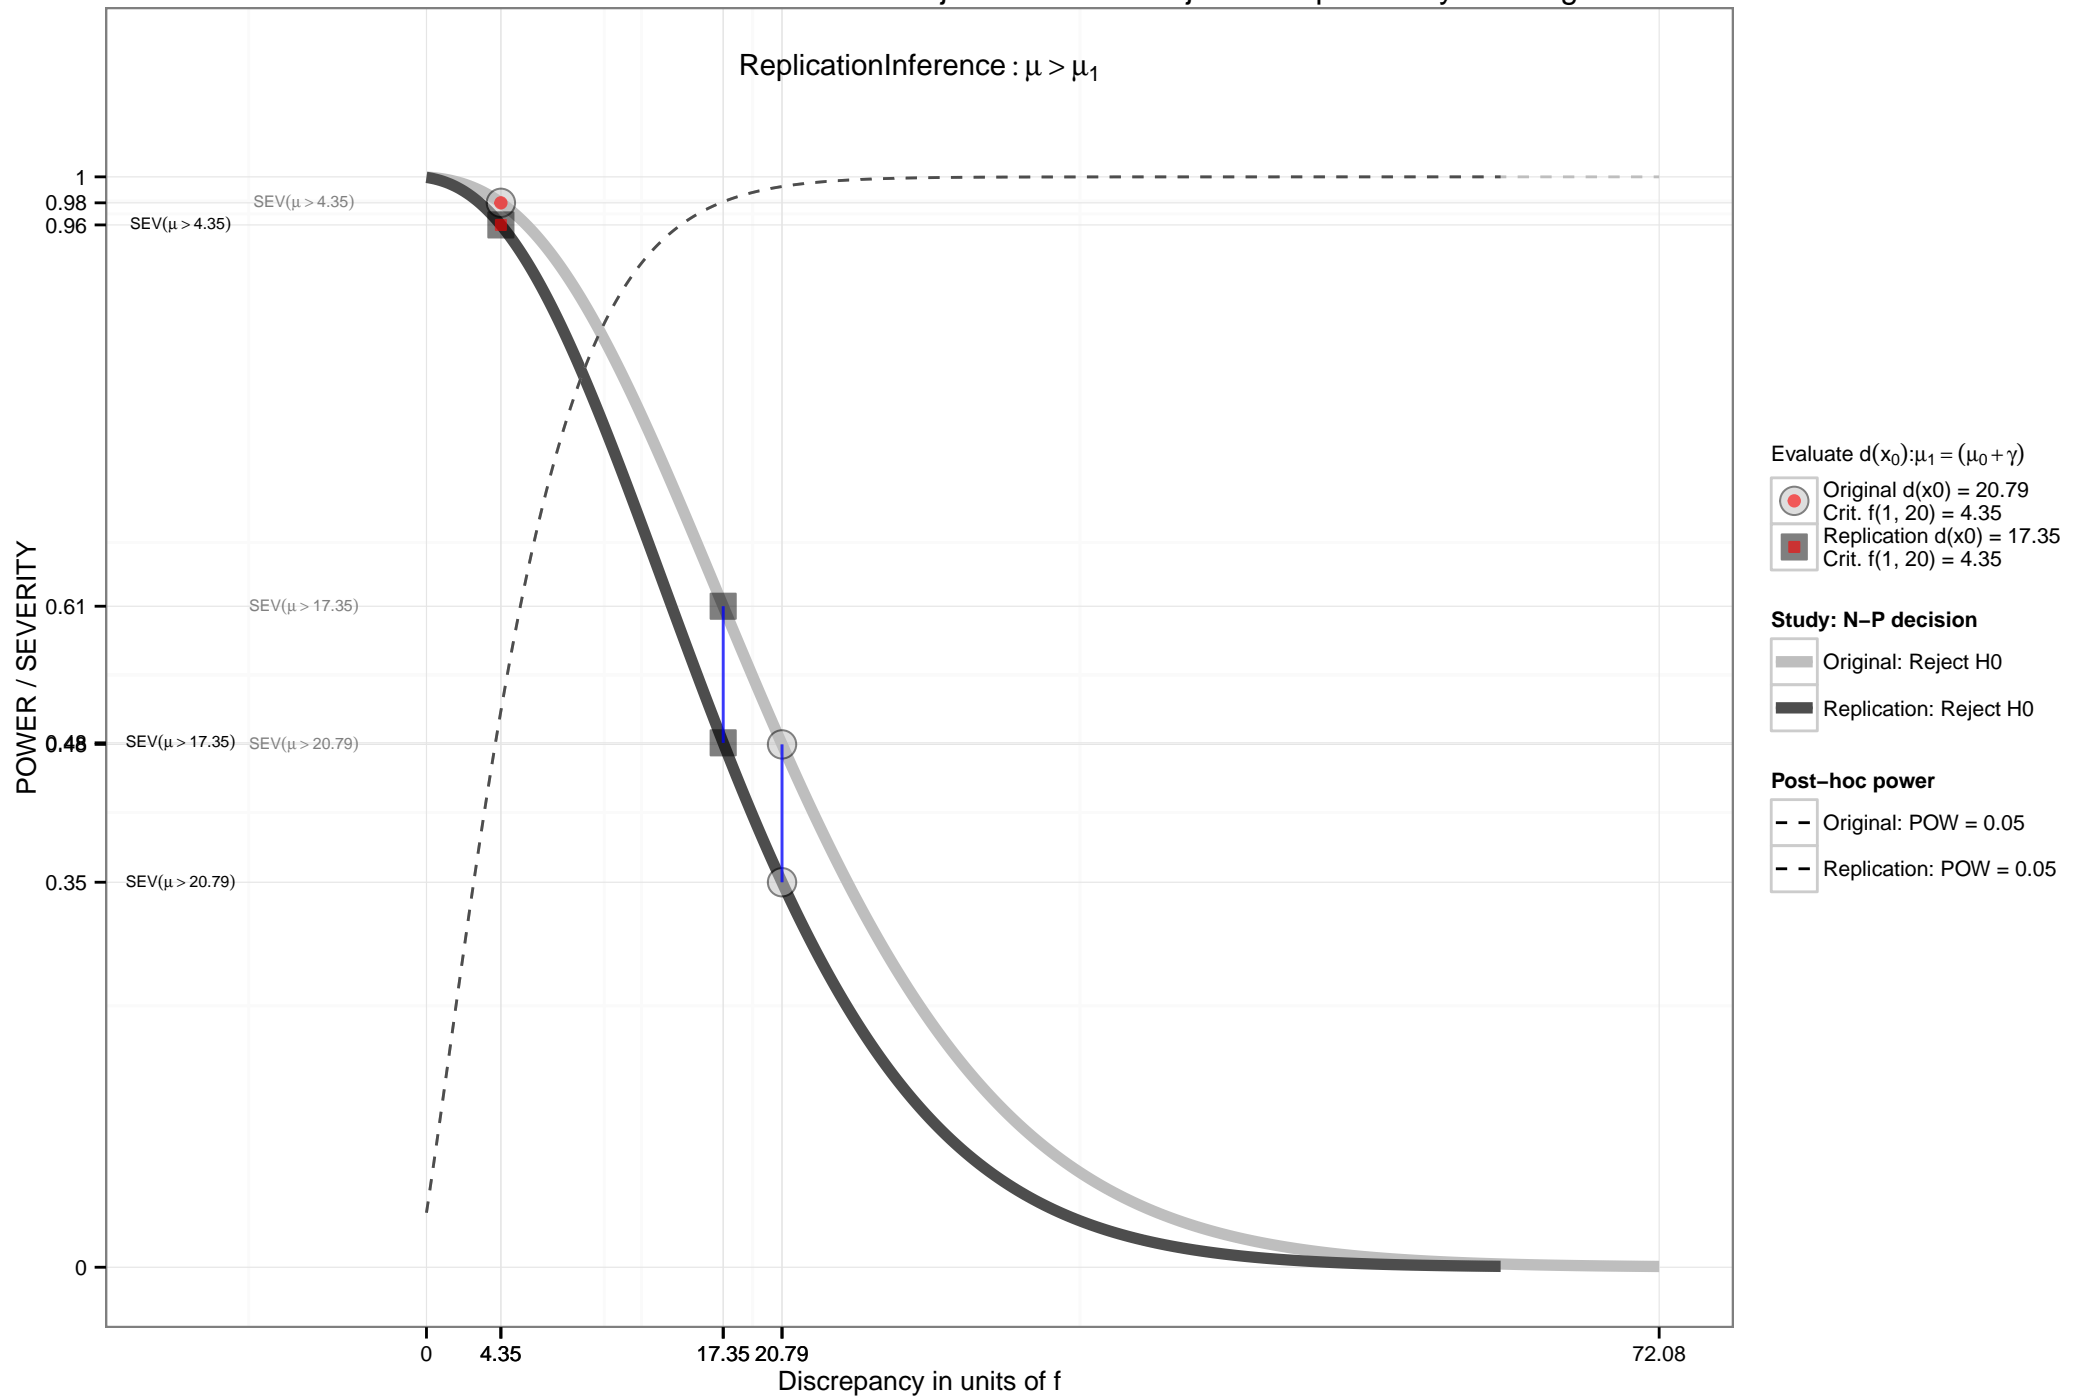

16 Accounting for occurrences: A new view of the use of contingency information in causal judgment.

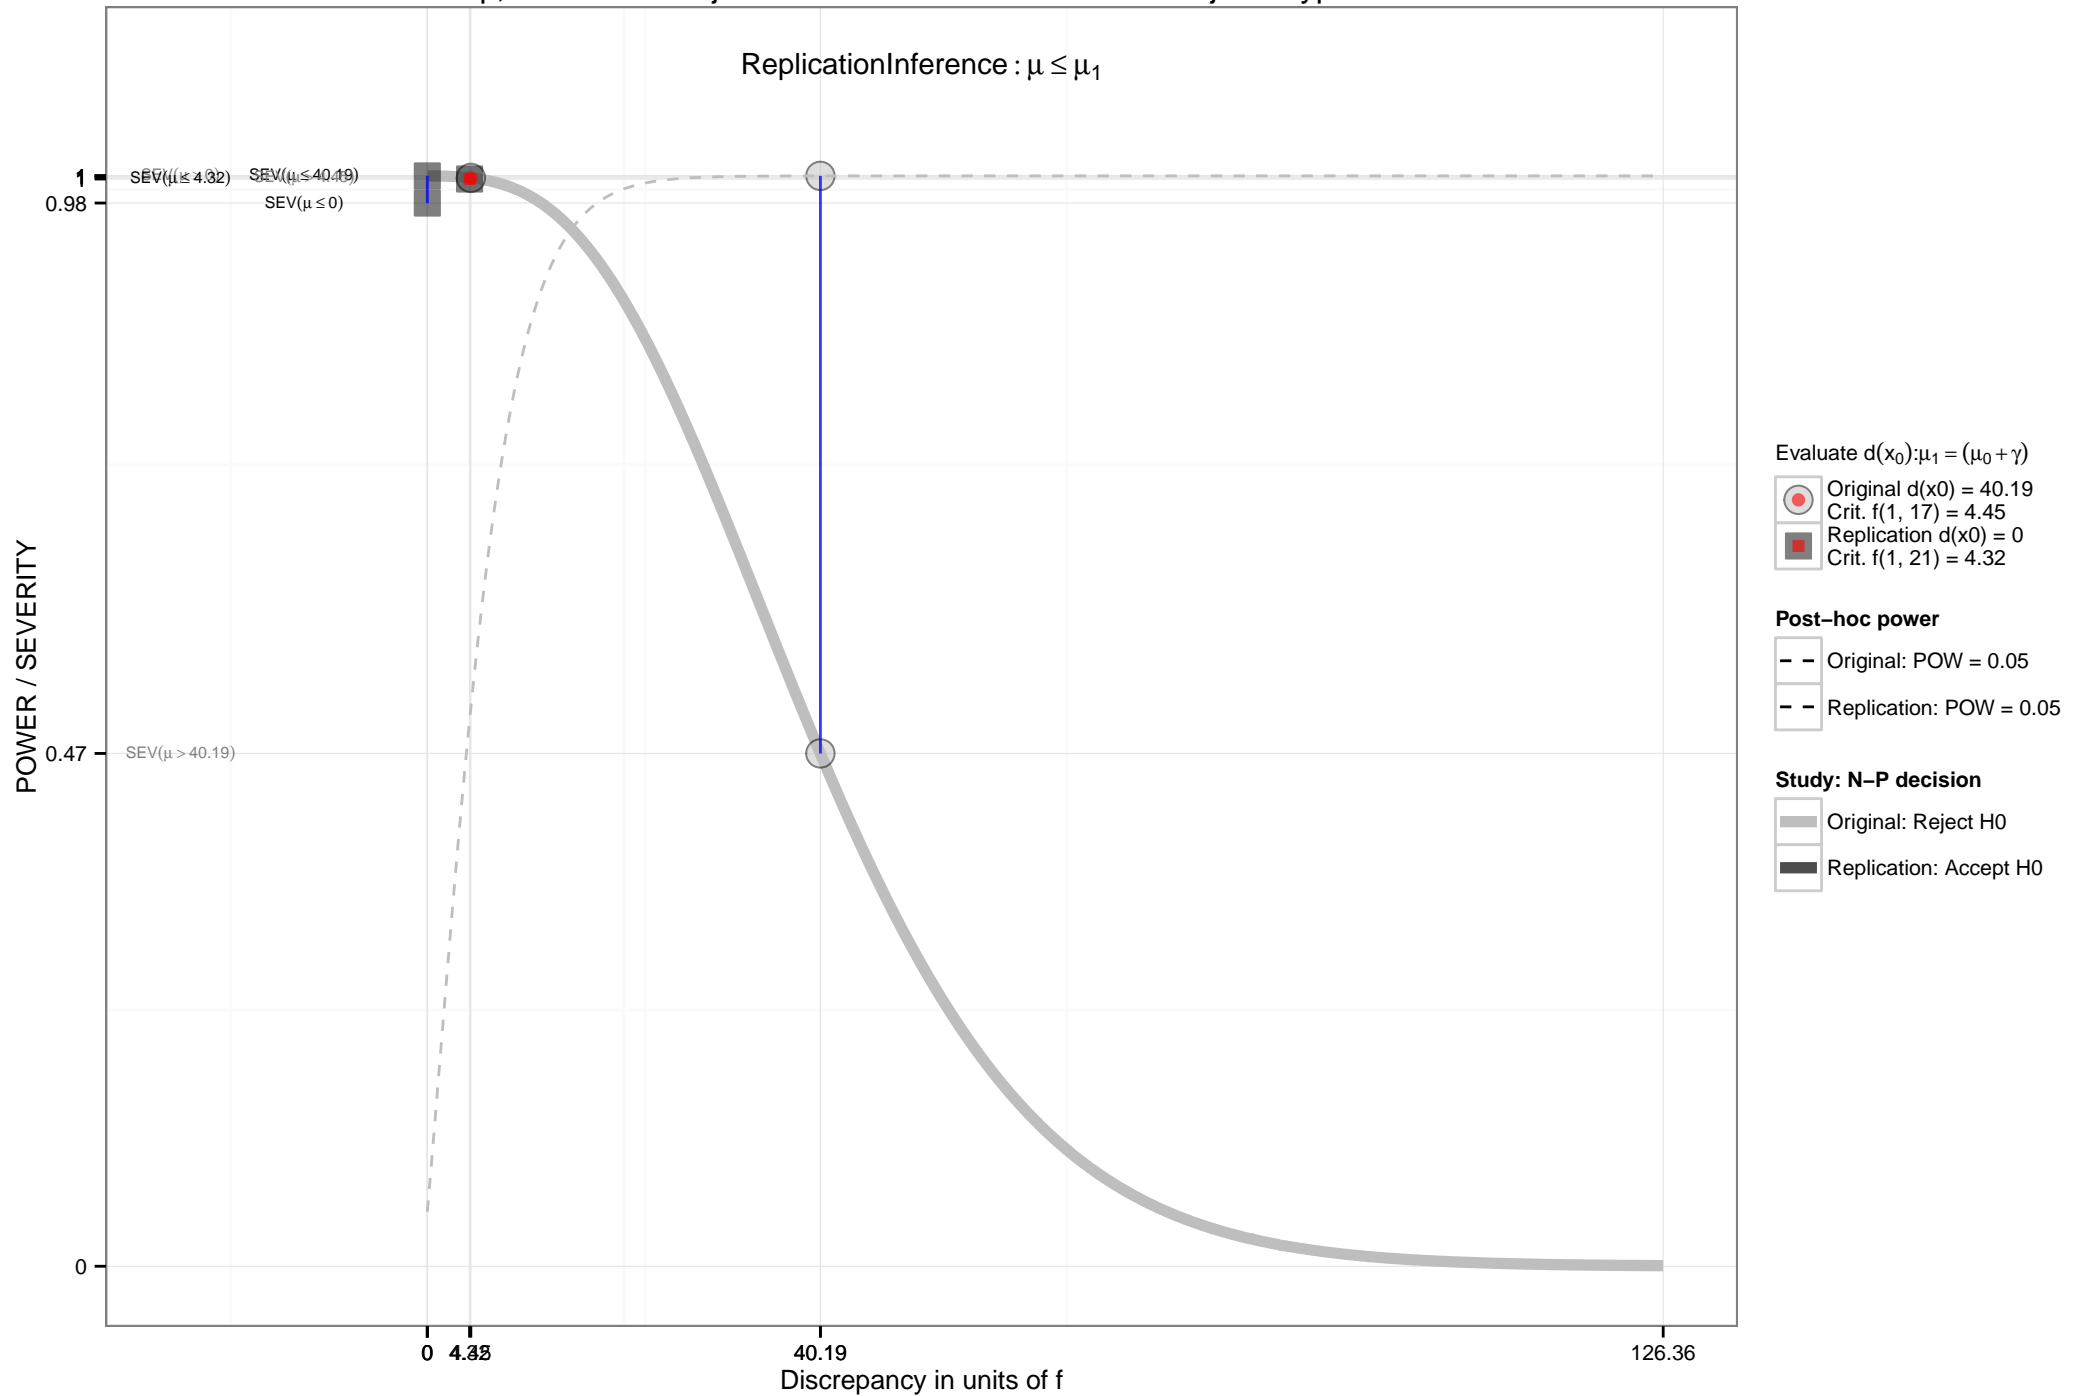

7 Attractor dynamics and semantic neighborhood density: Processing is slowed by near neighbors and speeded by distant neighbors.

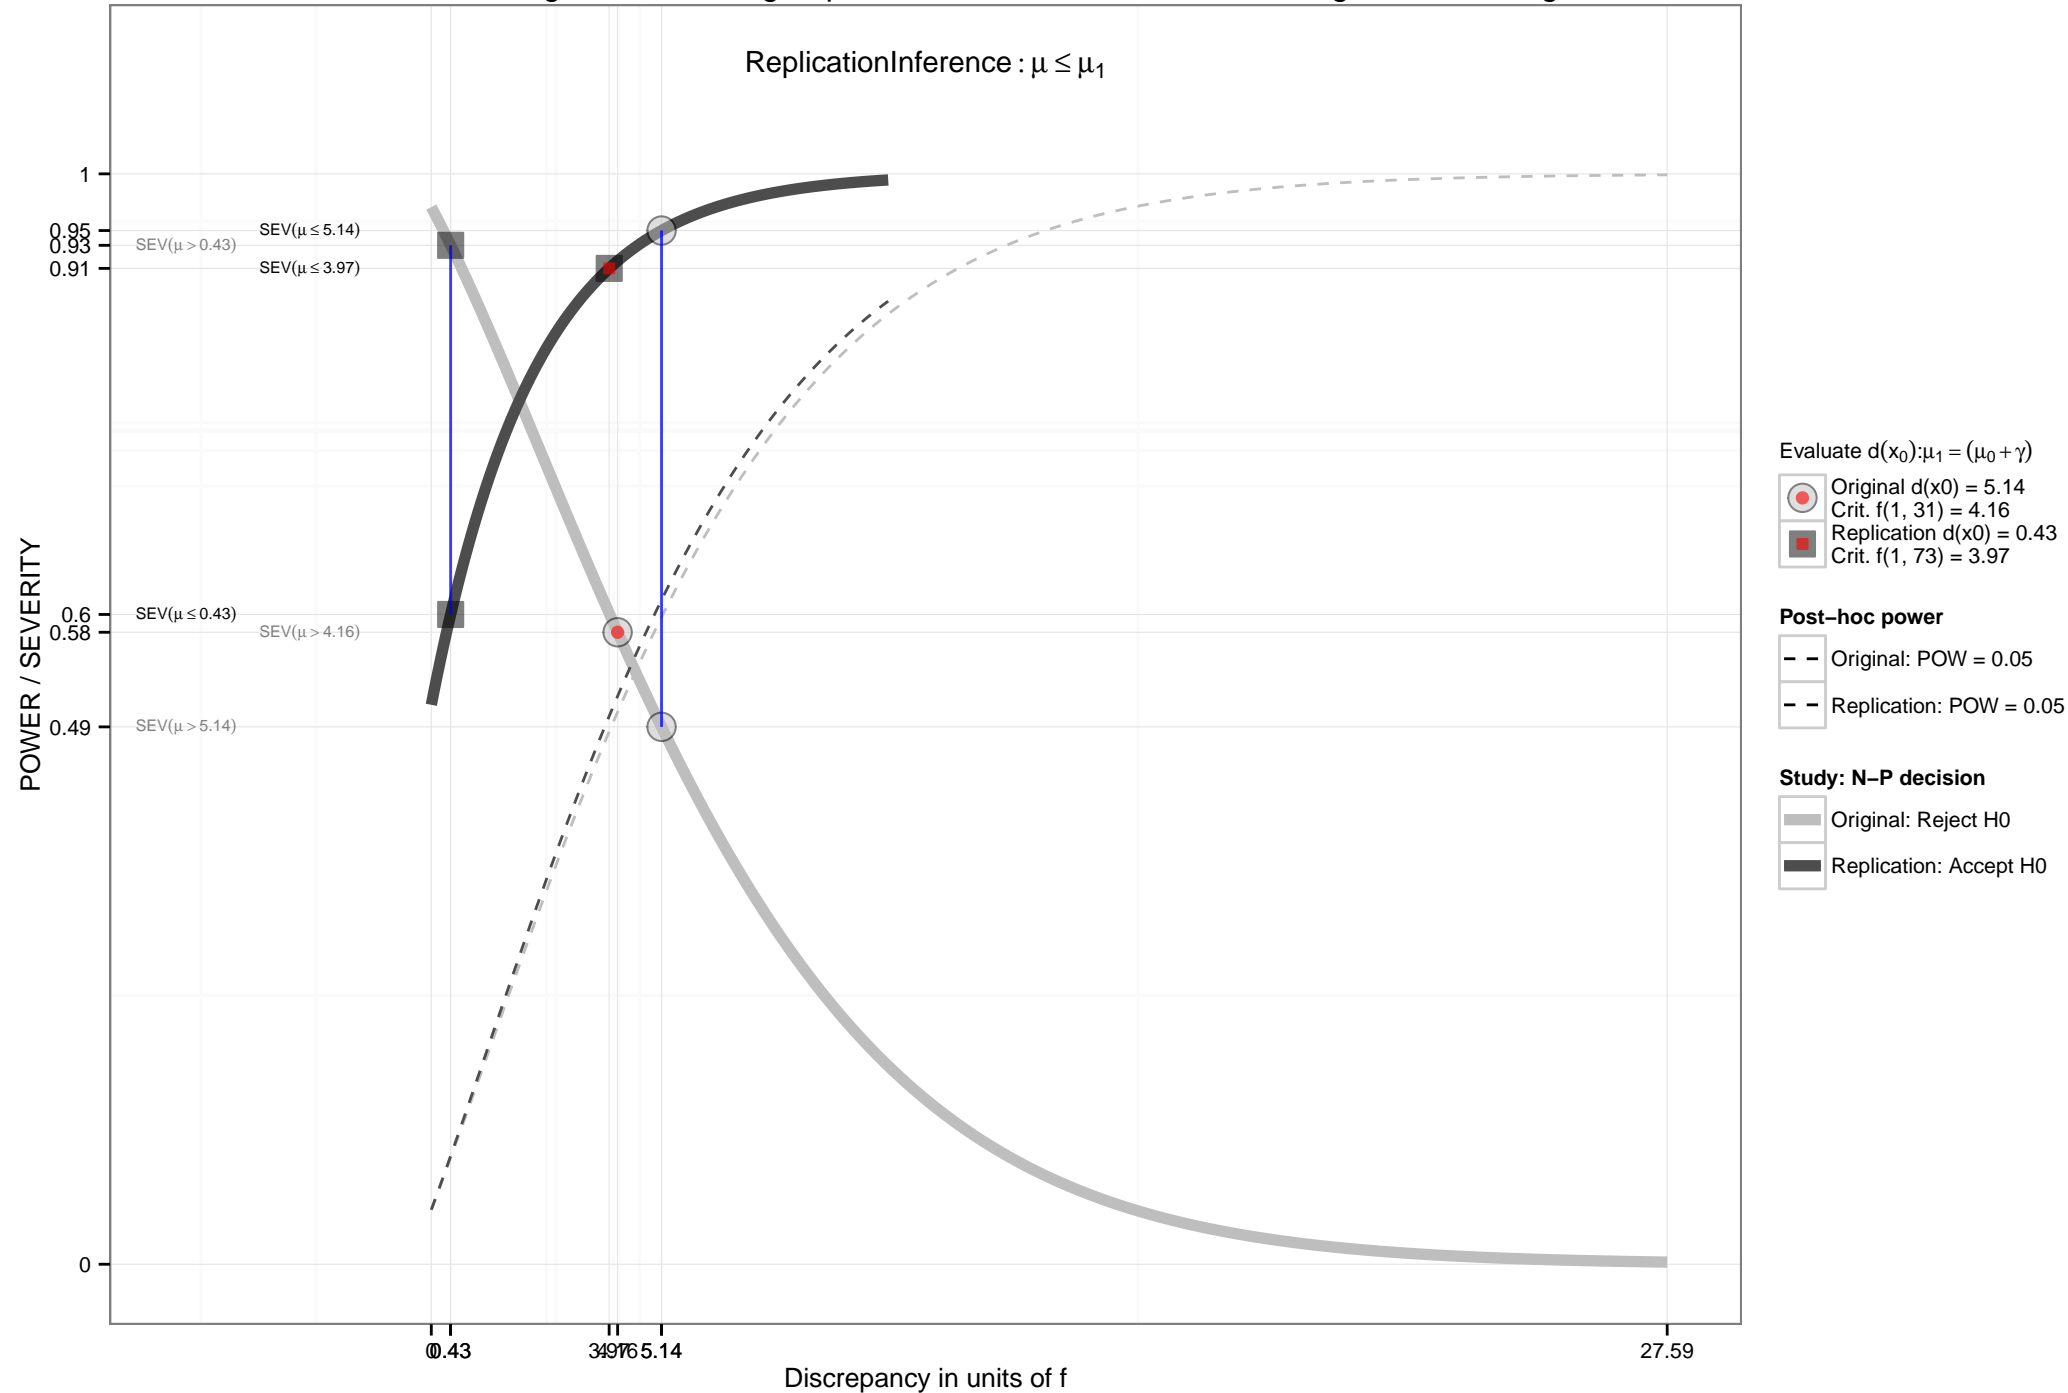

18 An attention-based associative account of adjacent and nonadjacent dependency learning.

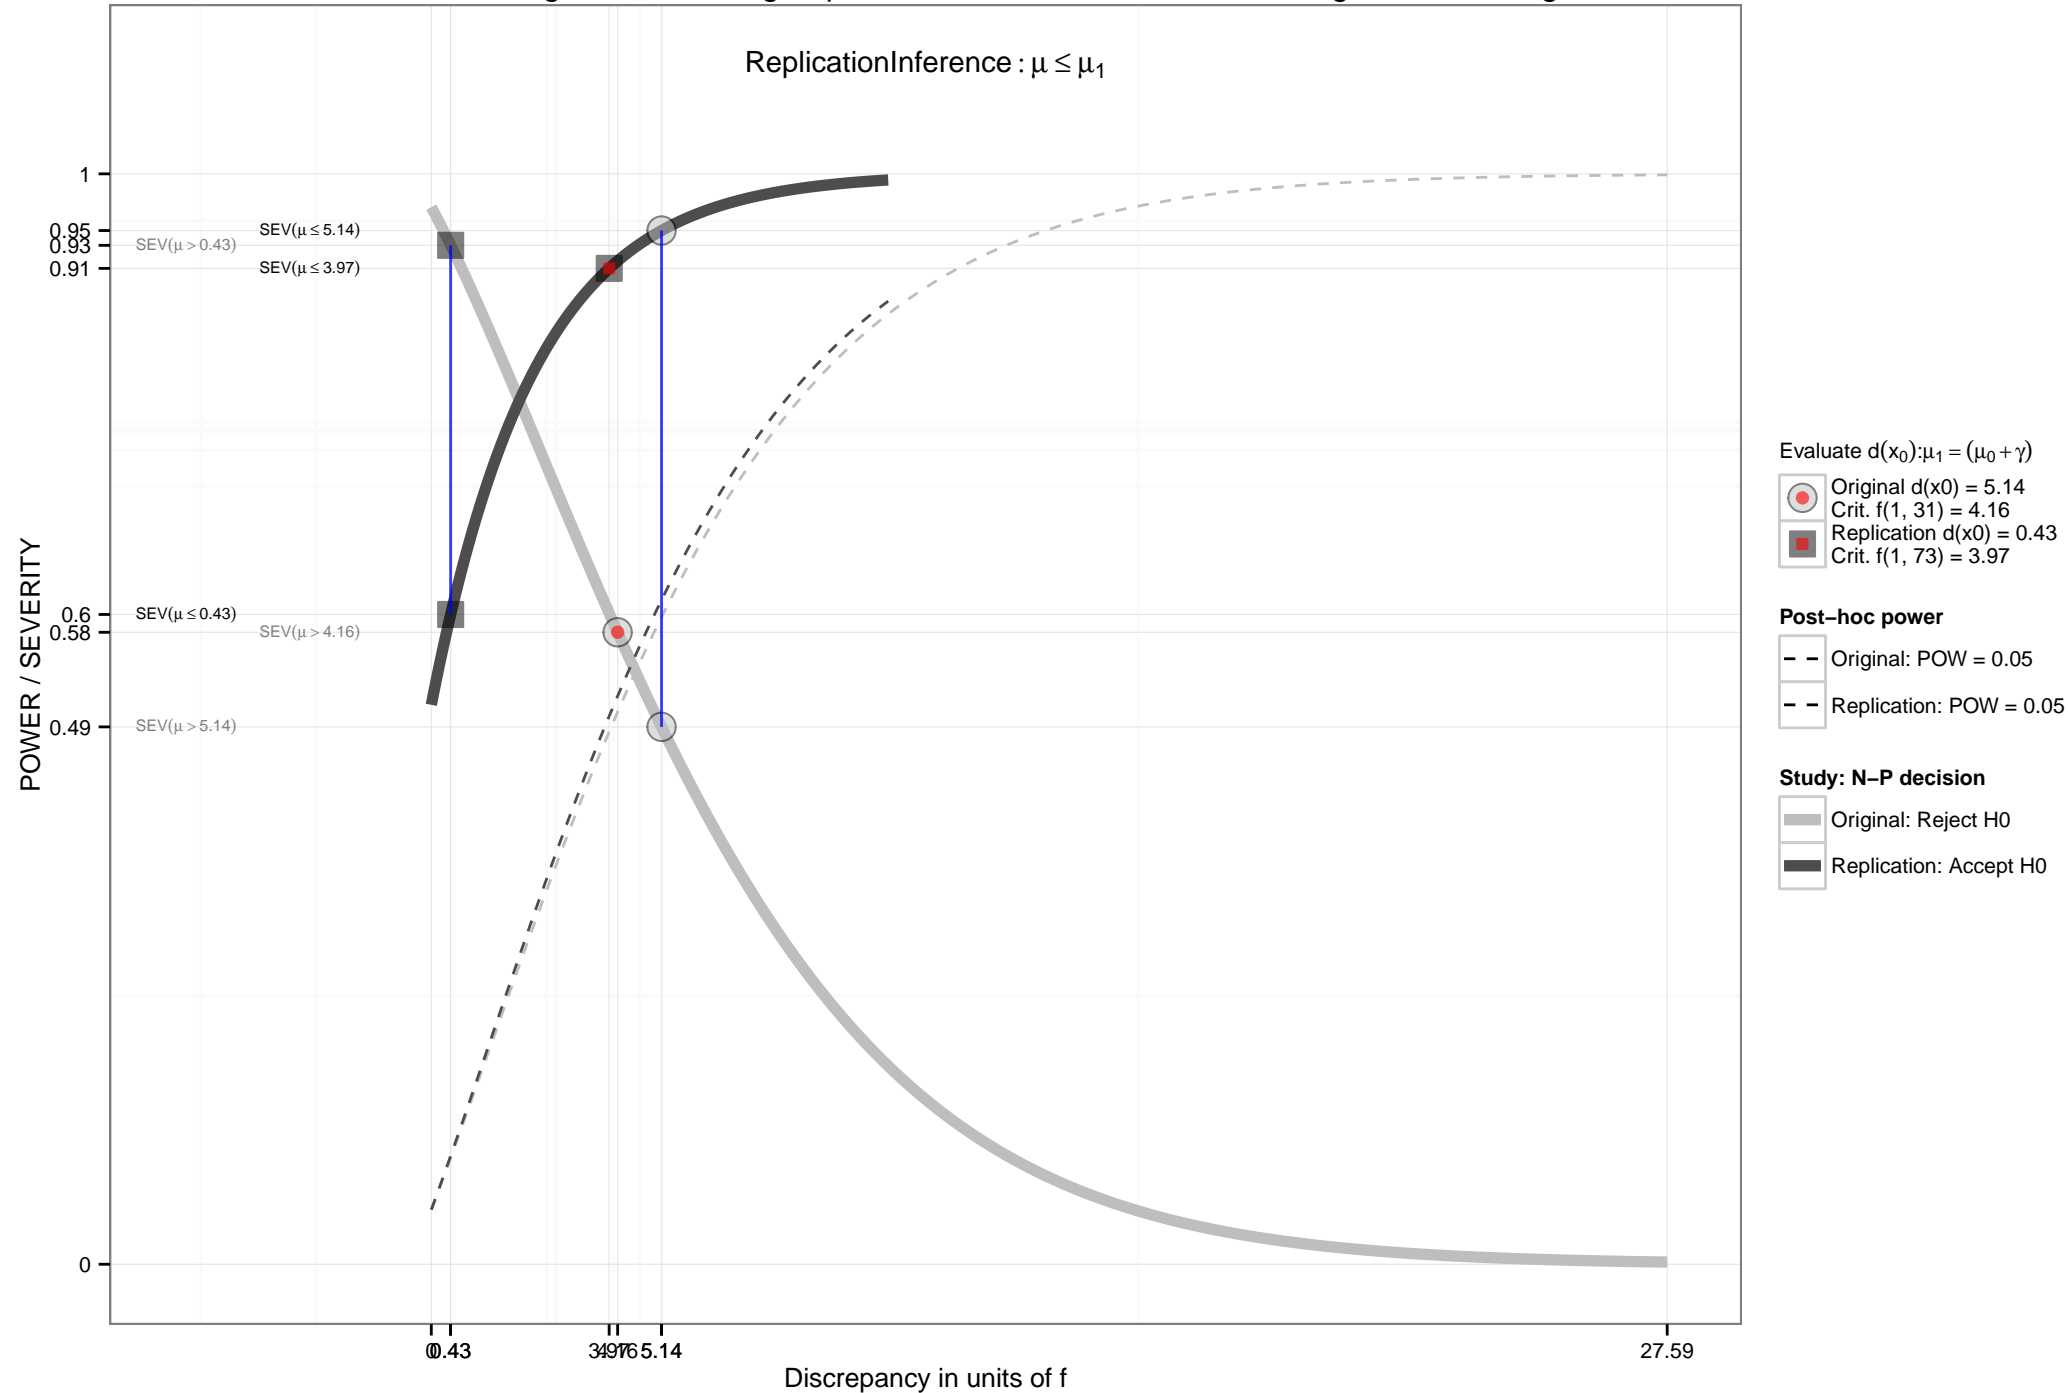

19 Head up, foot down: Object words orient attention to the objects' typical location.

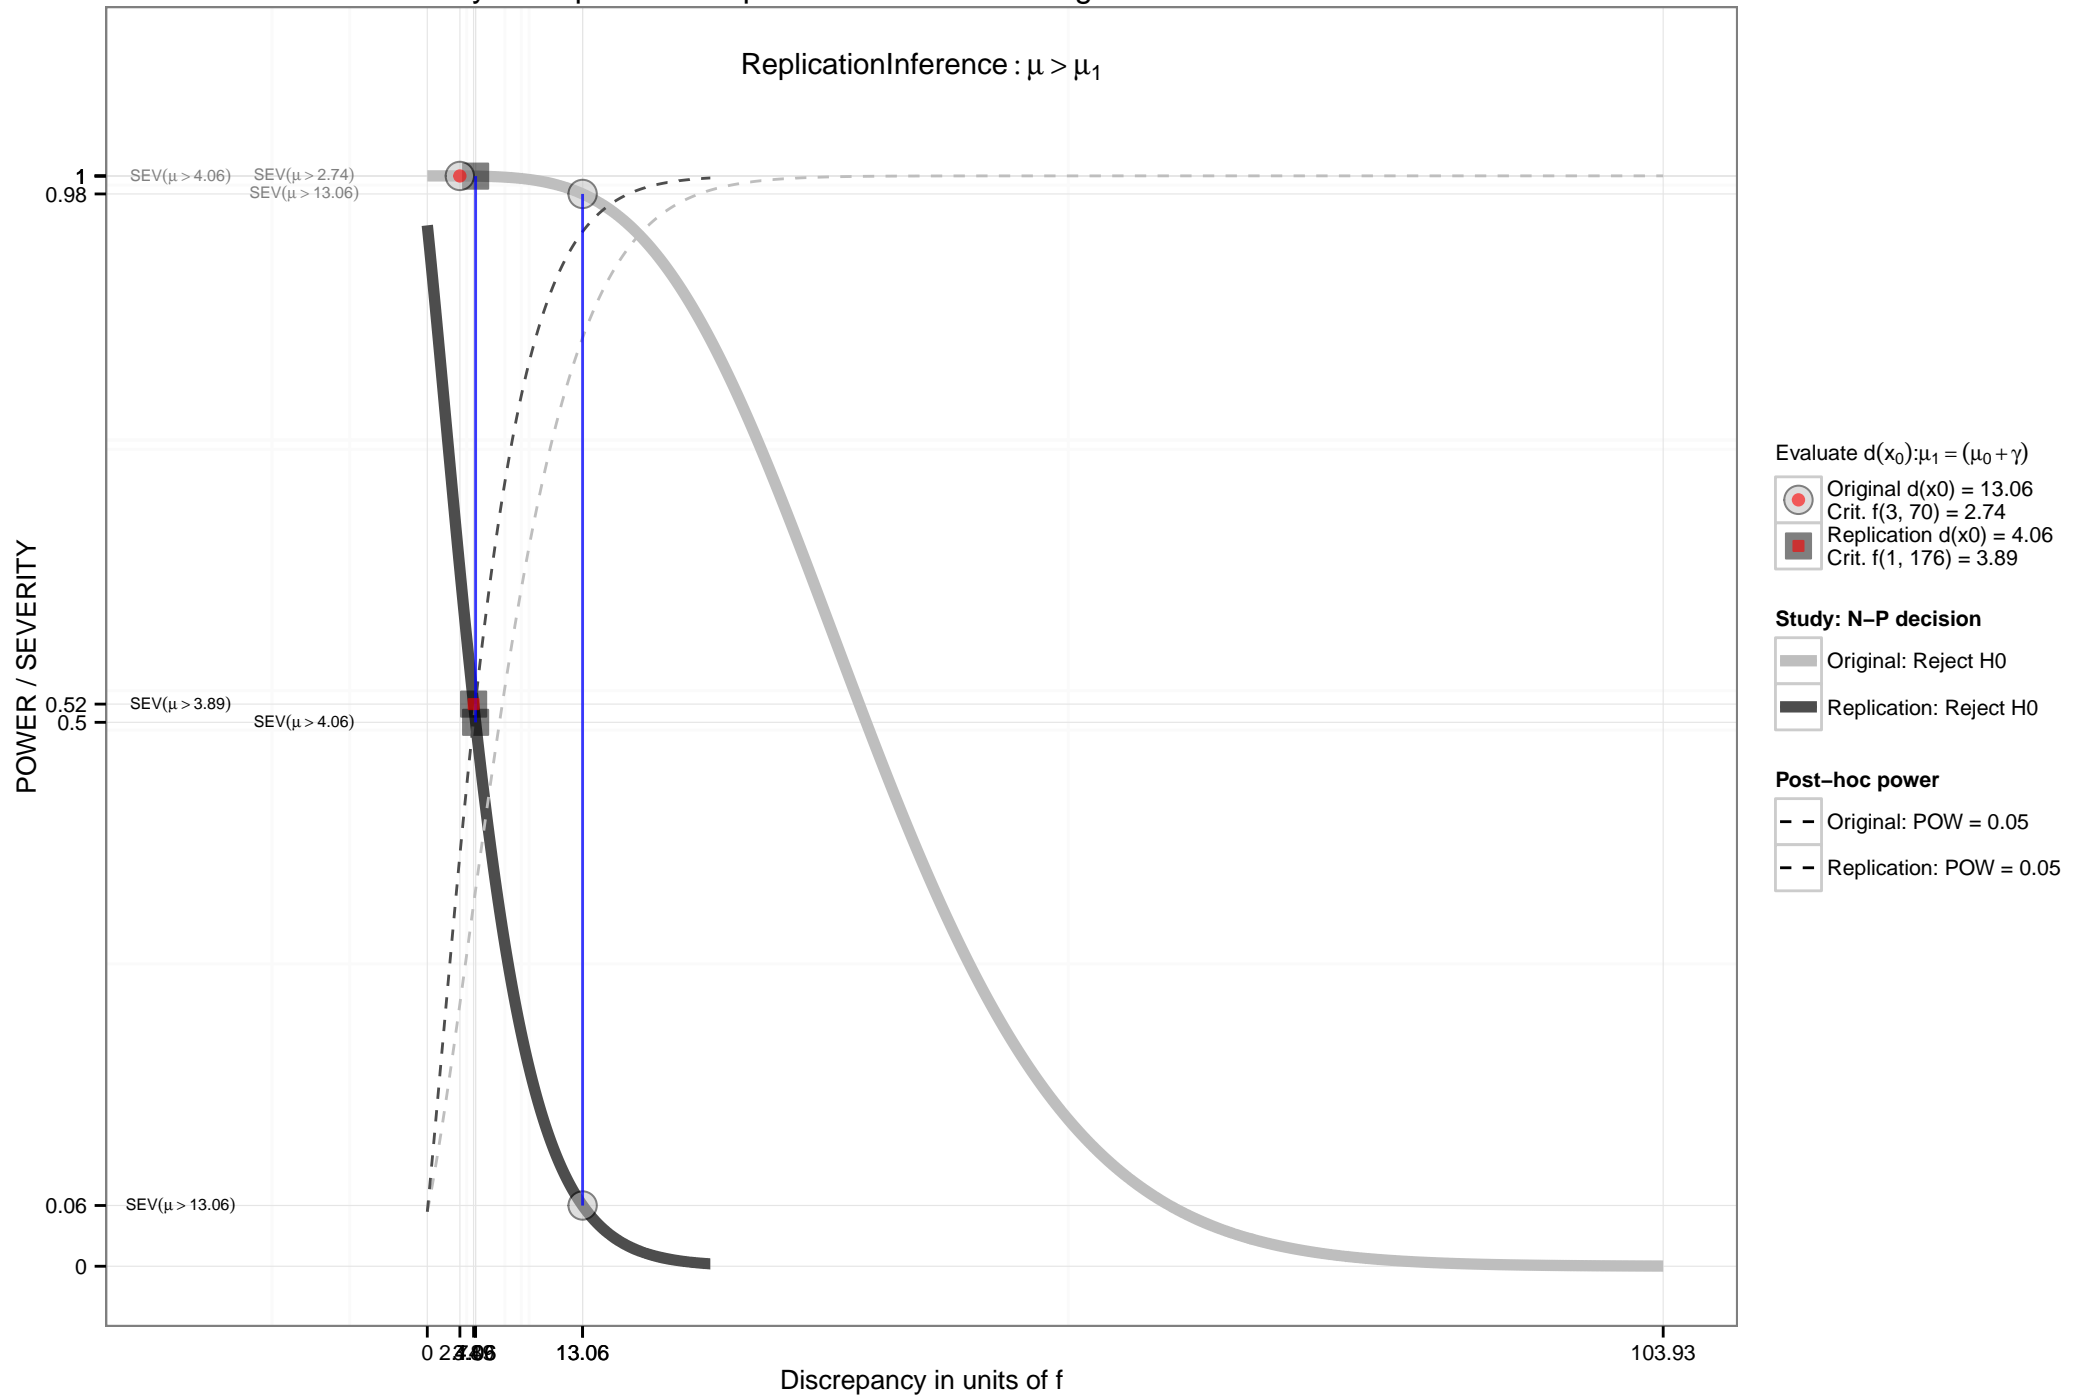

20 Individual differences in the regulation of intergroup bias: The role of conflict monitoring and neural signals for control.

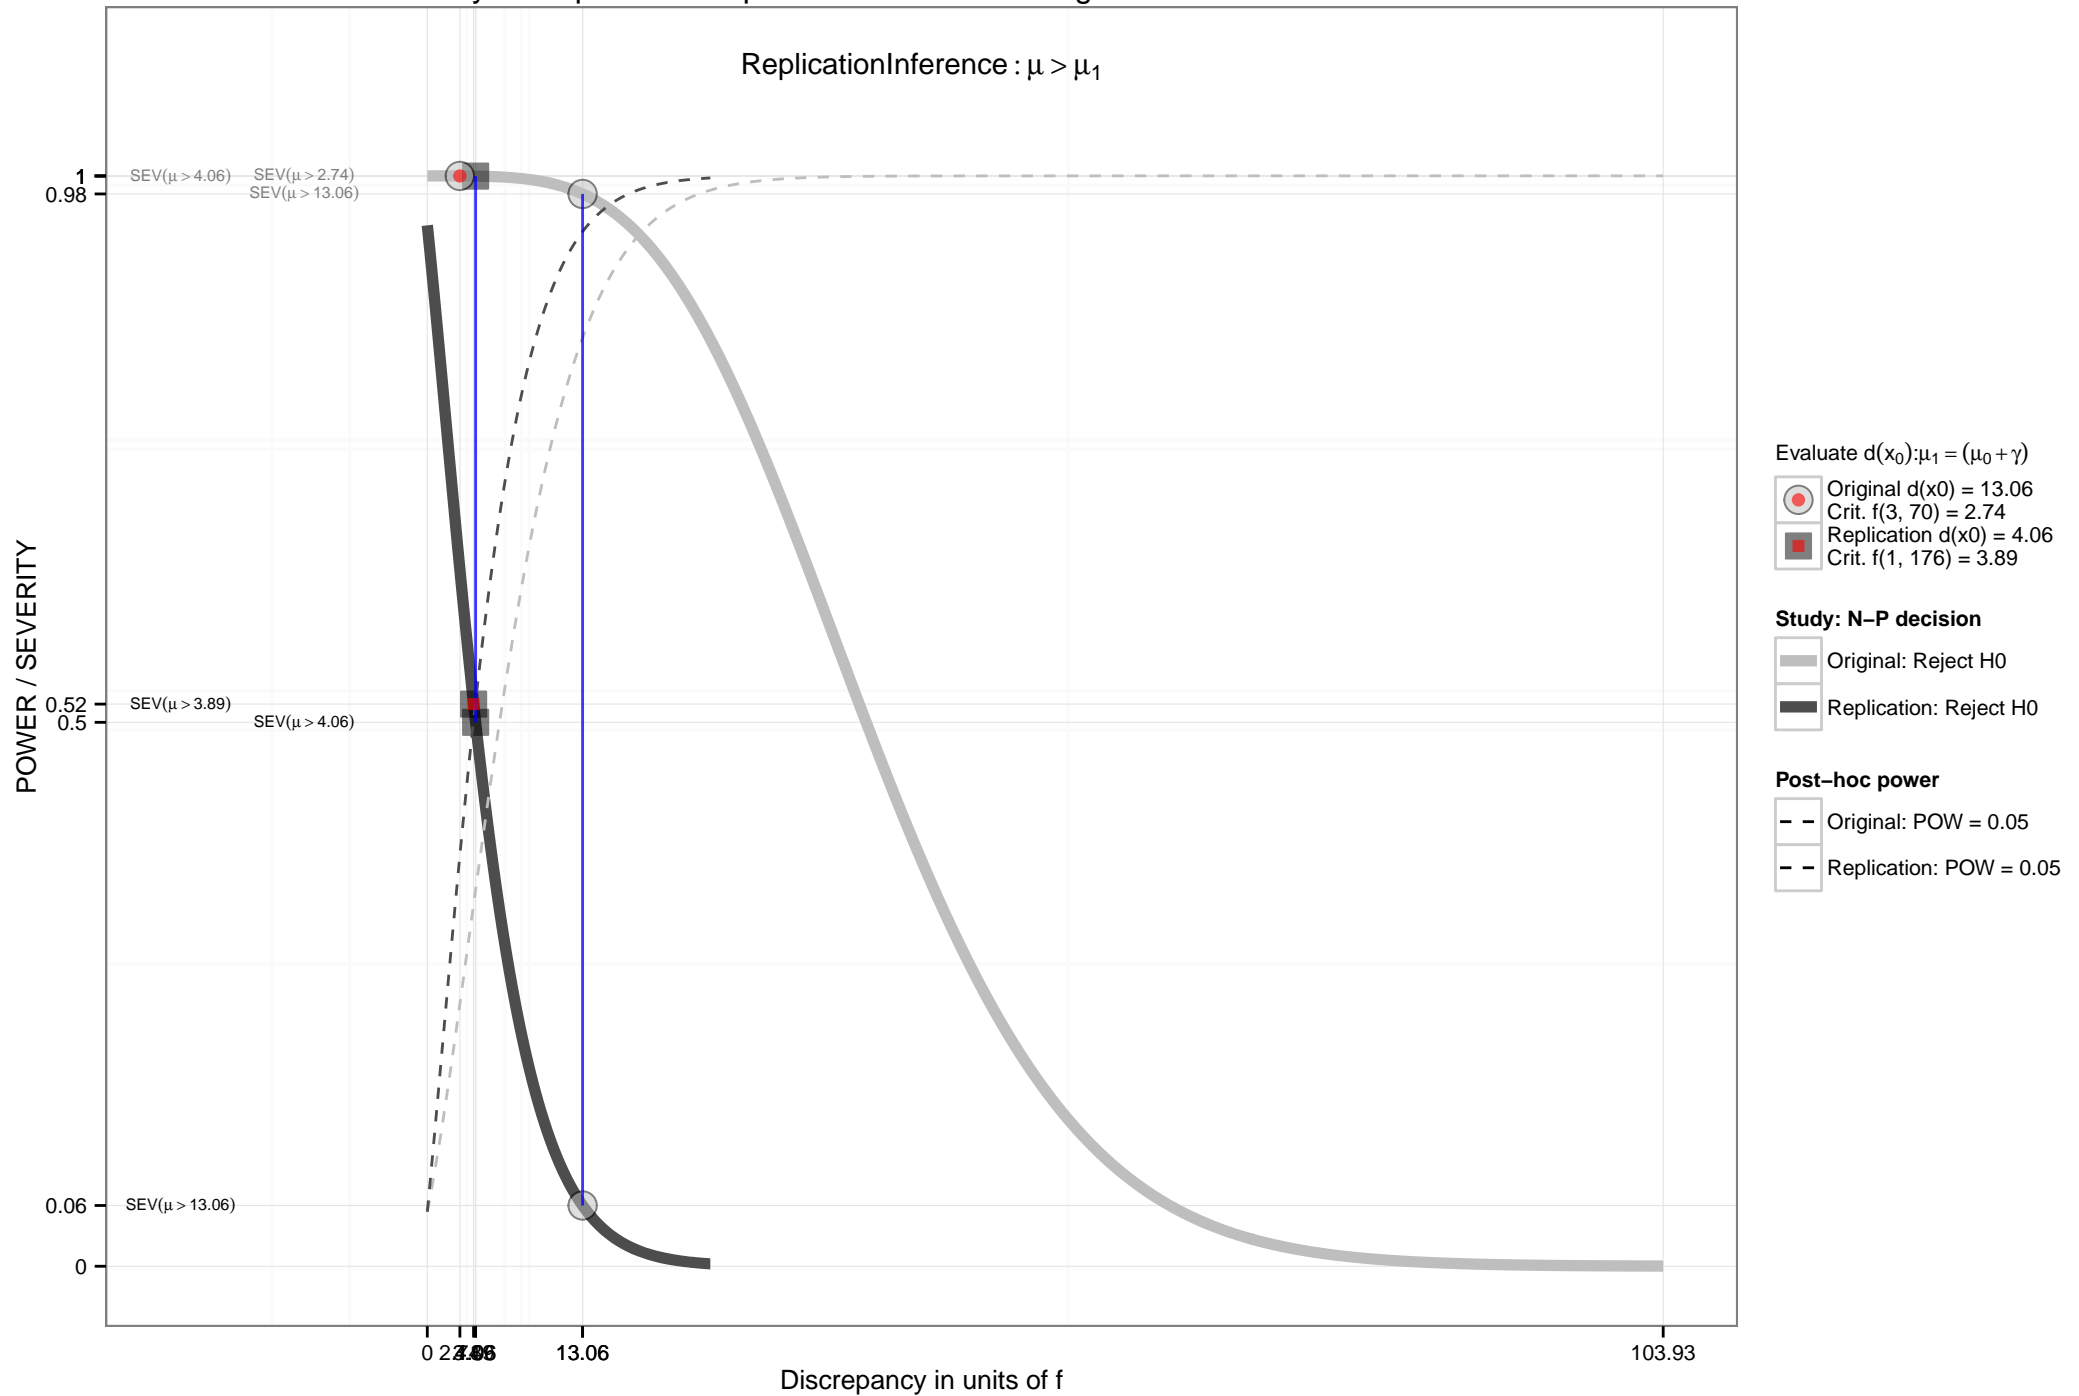

20 Individual differences in the regulation of intergroup bias: The role of conflict monitoring and neural signals for control.

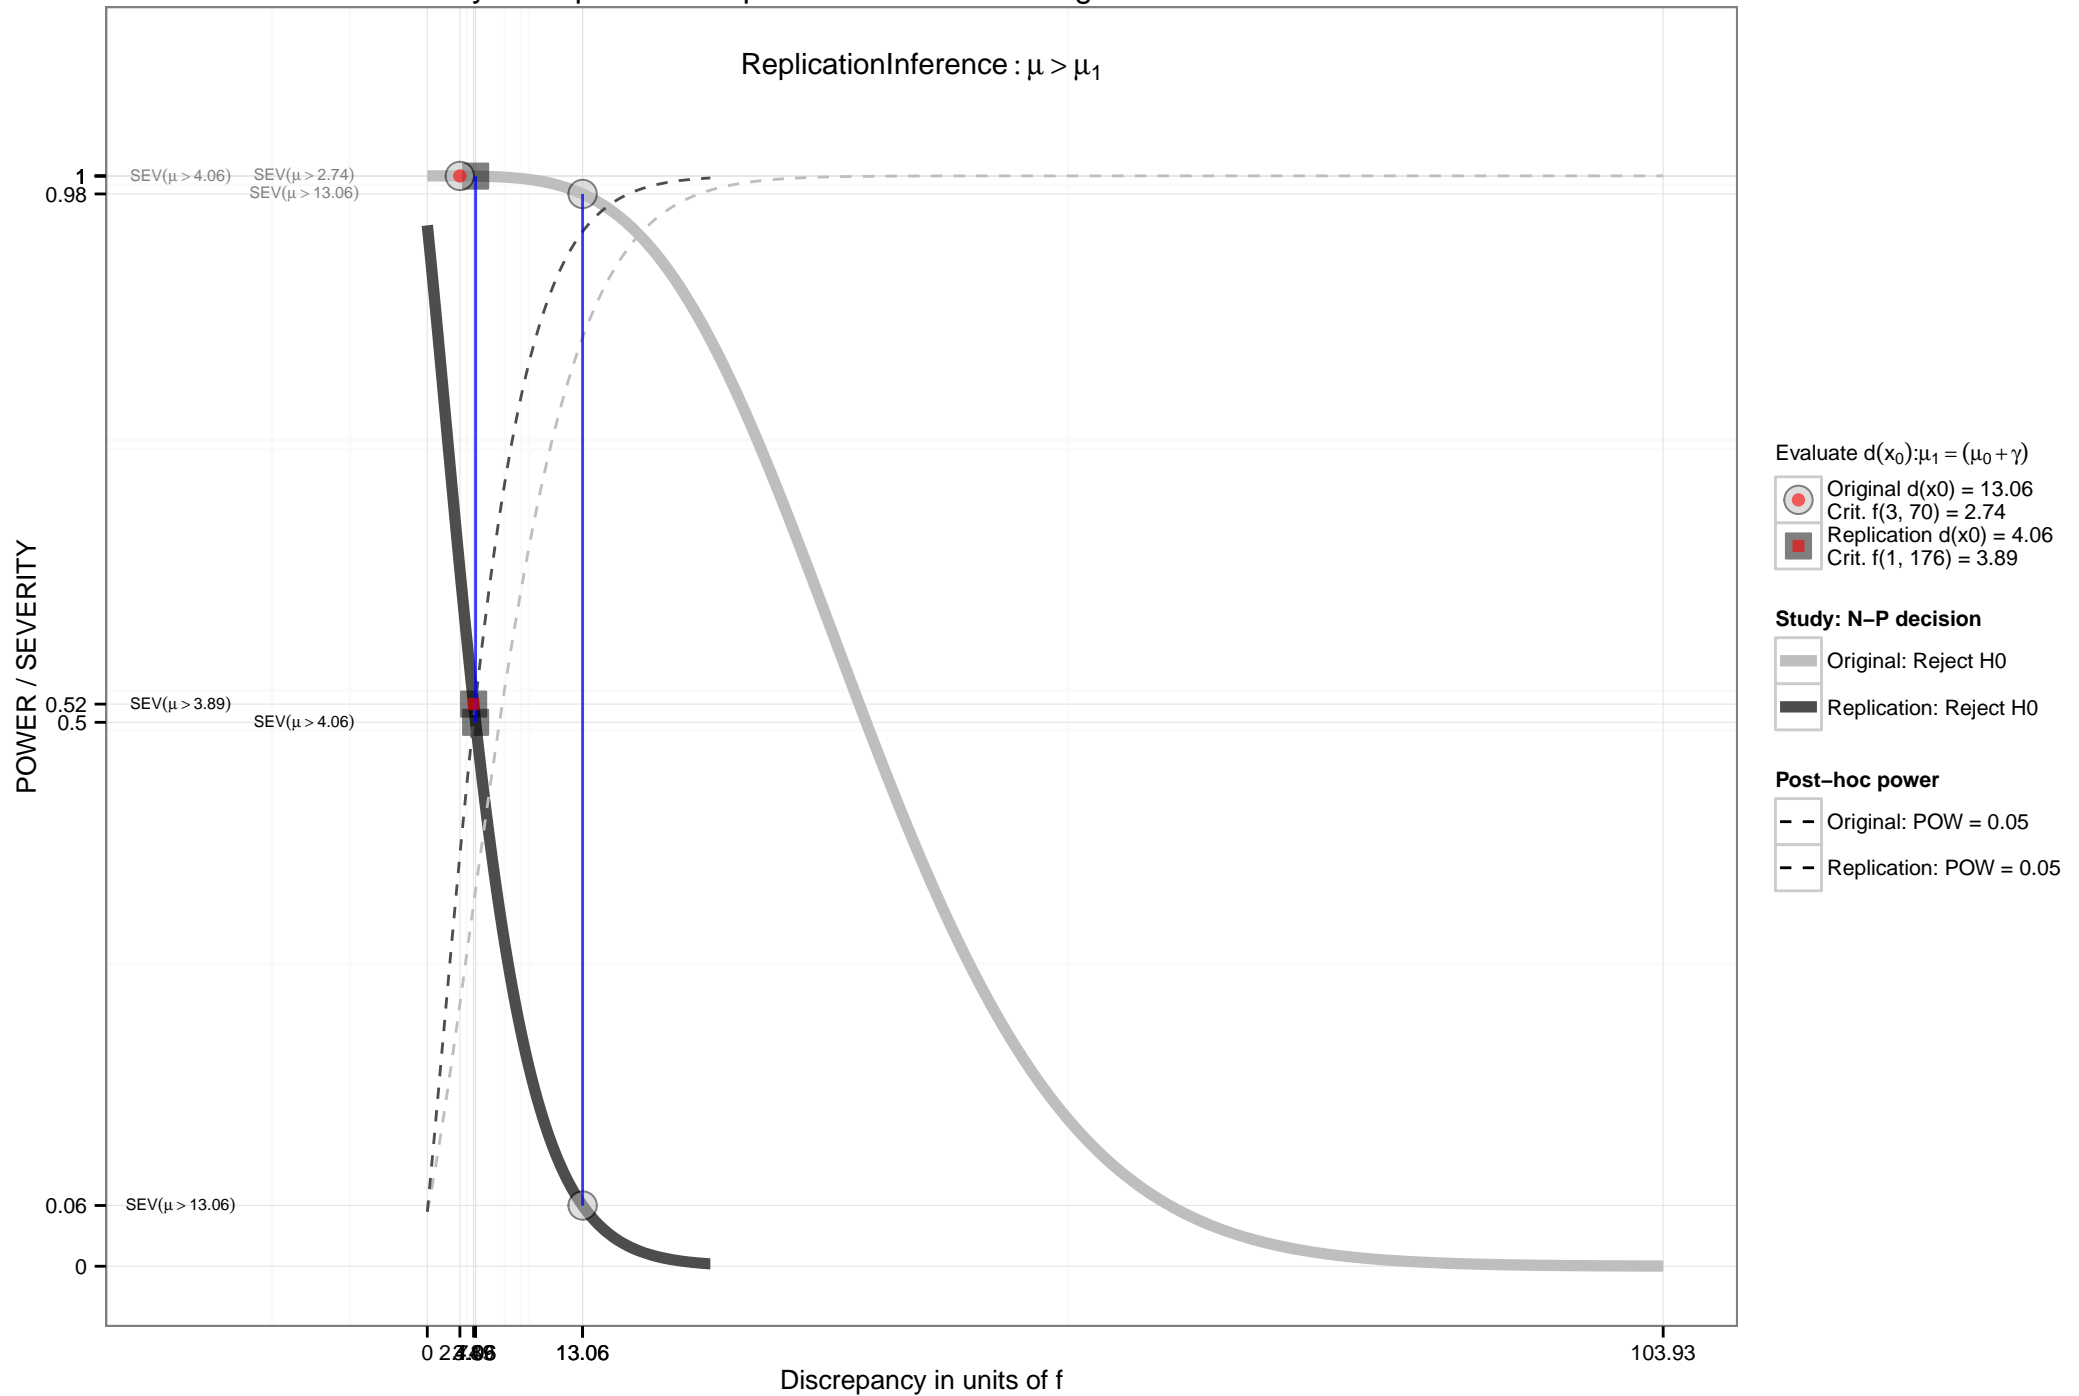

22 Why do implicit and explicit attitude tests diverge? the role of structural fit.

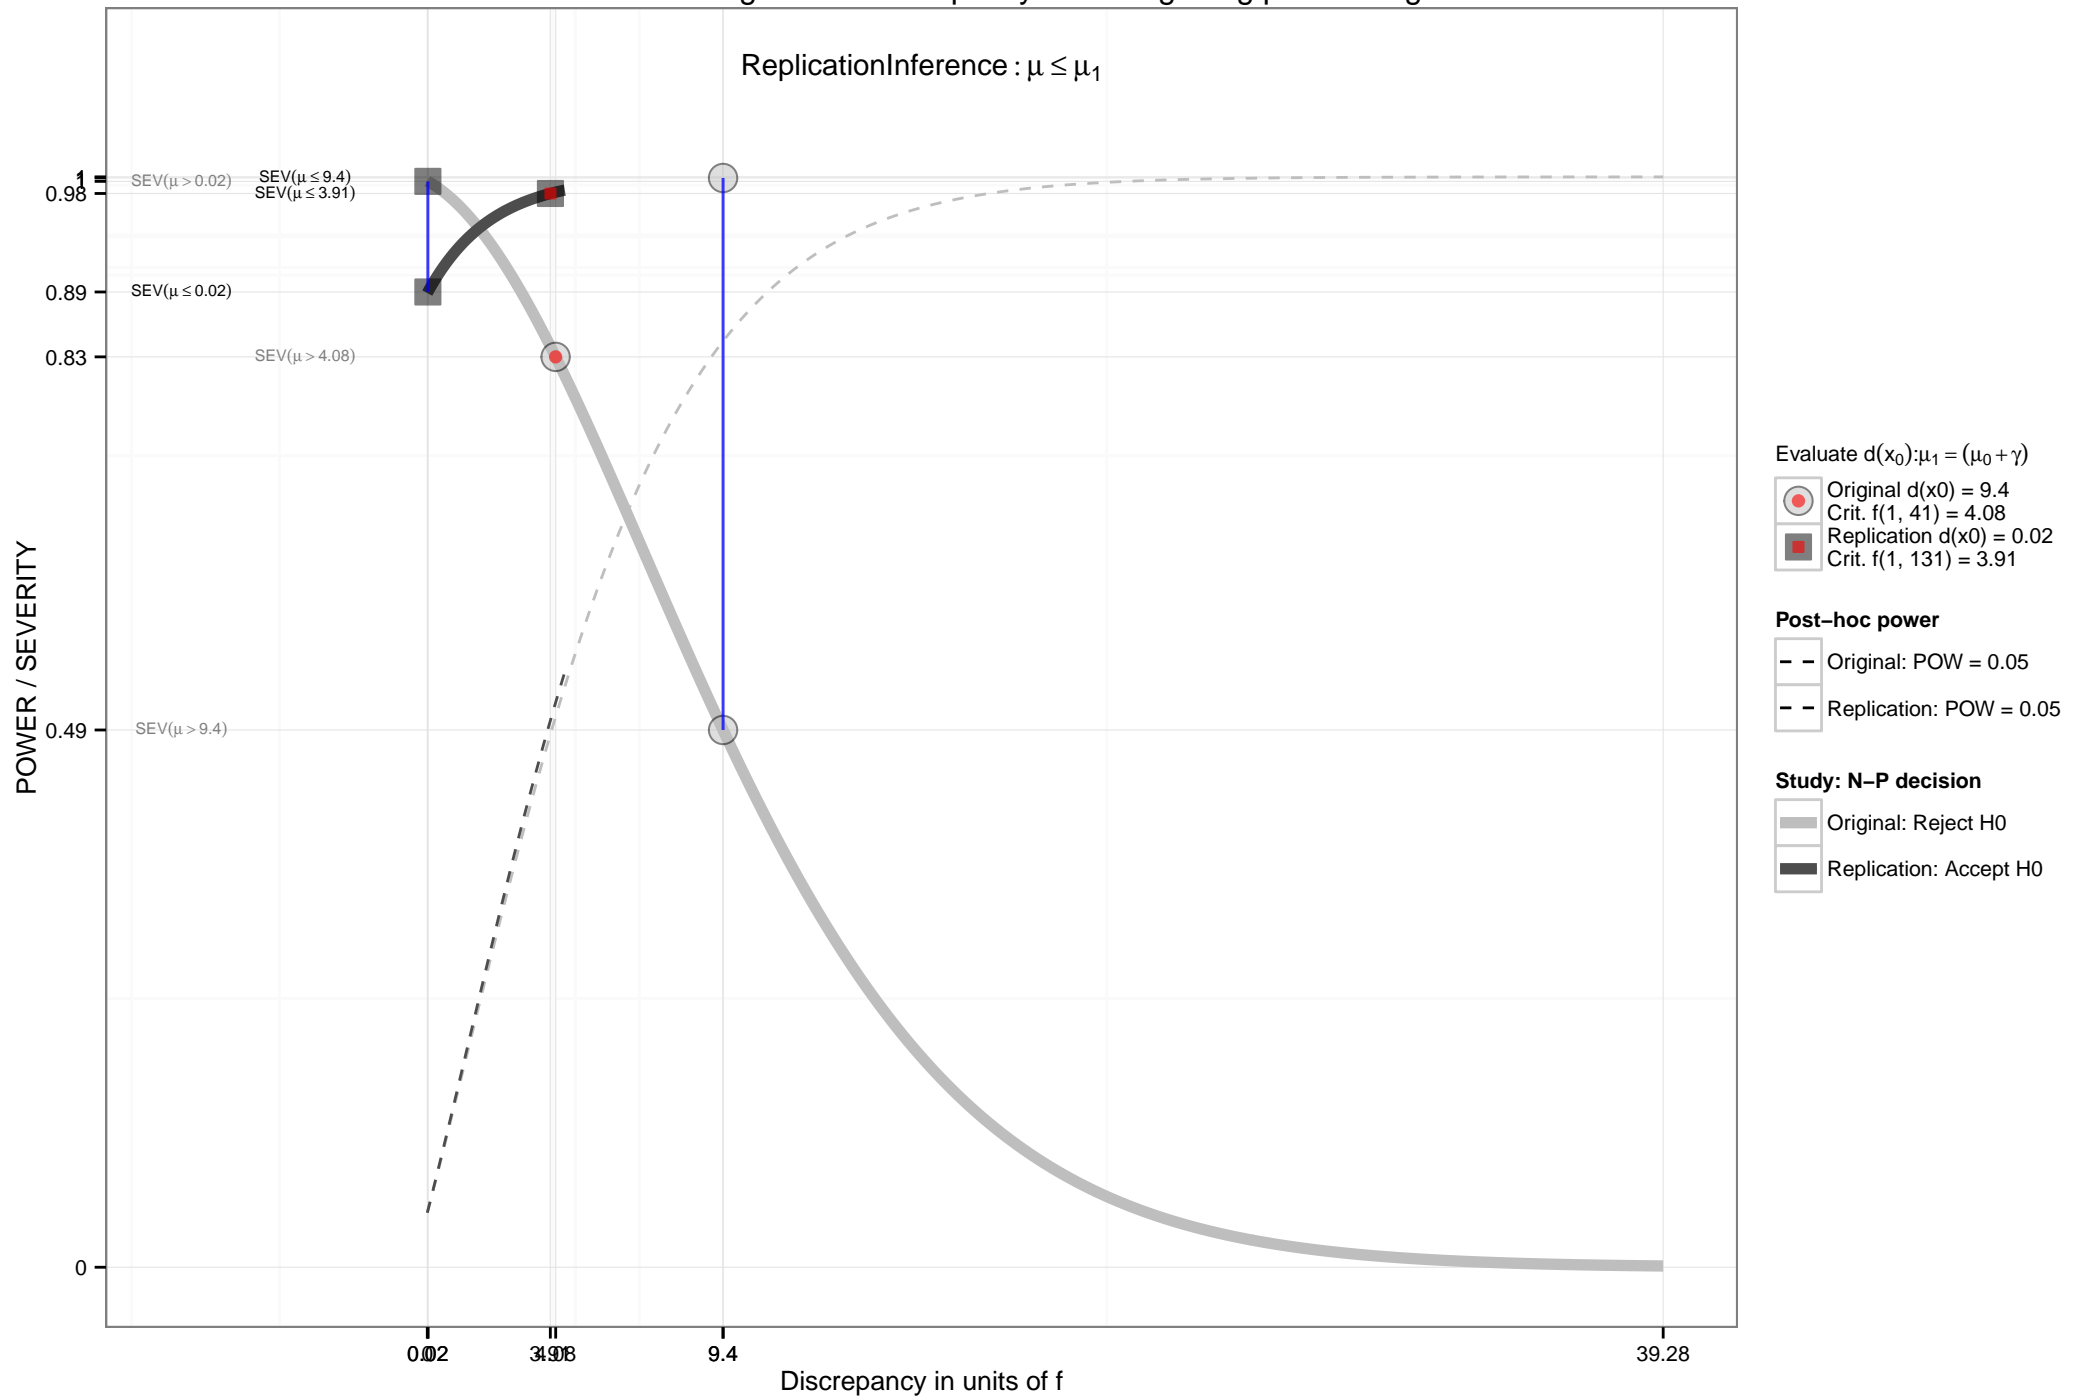

22 Why do implicit and explicit attitude tests diverge? the role of structural fit.

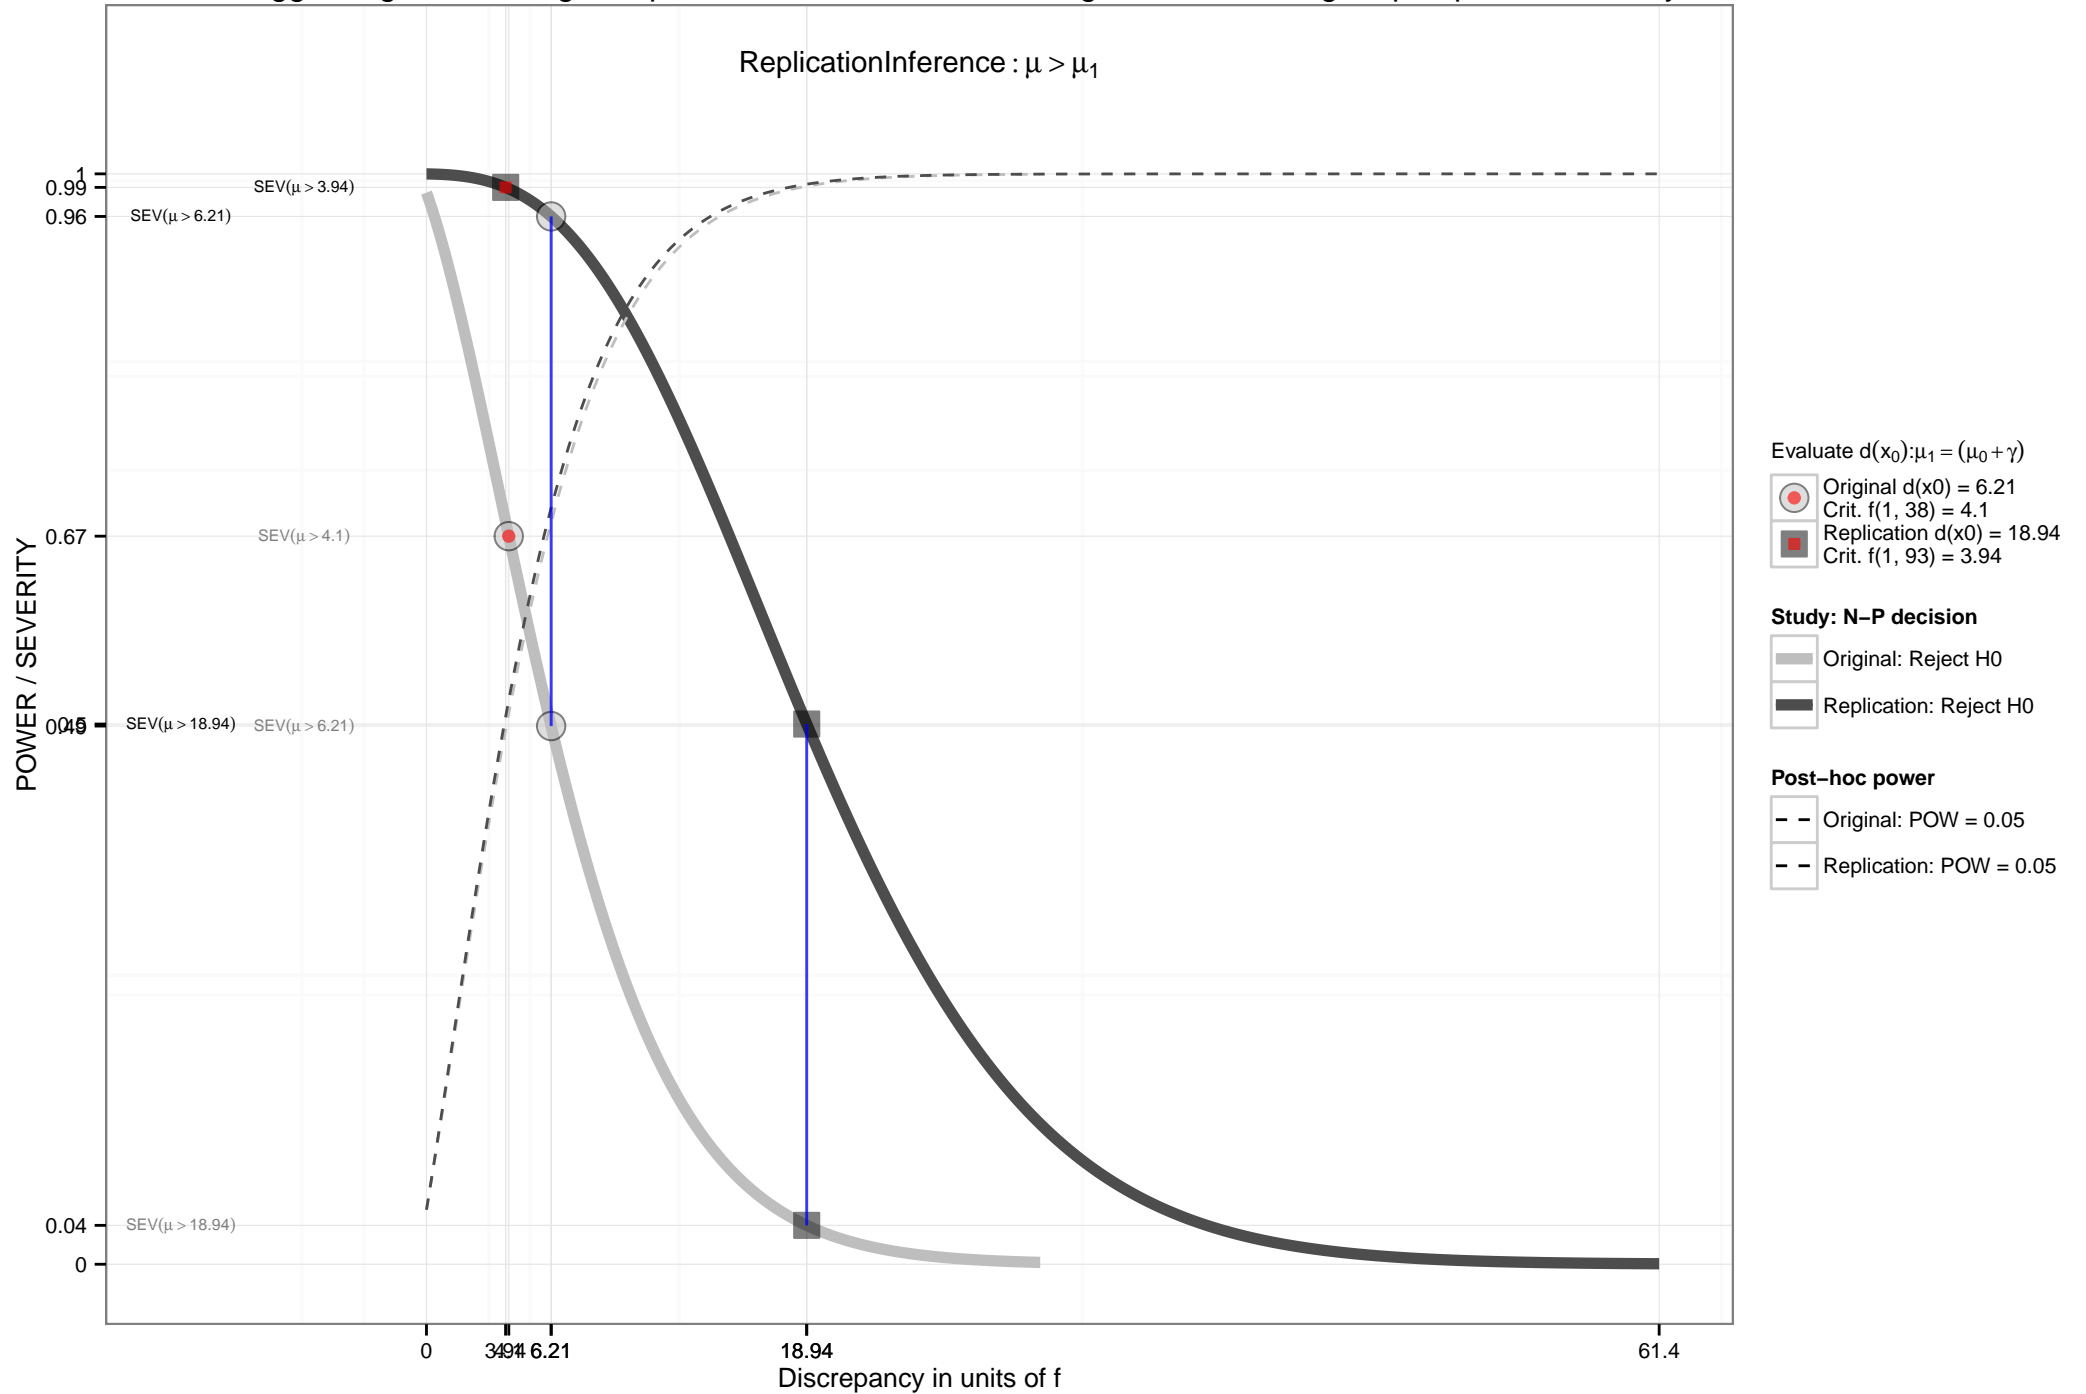

22 Why do implicit and explicit attitude tests diverge? the role of structural fit.

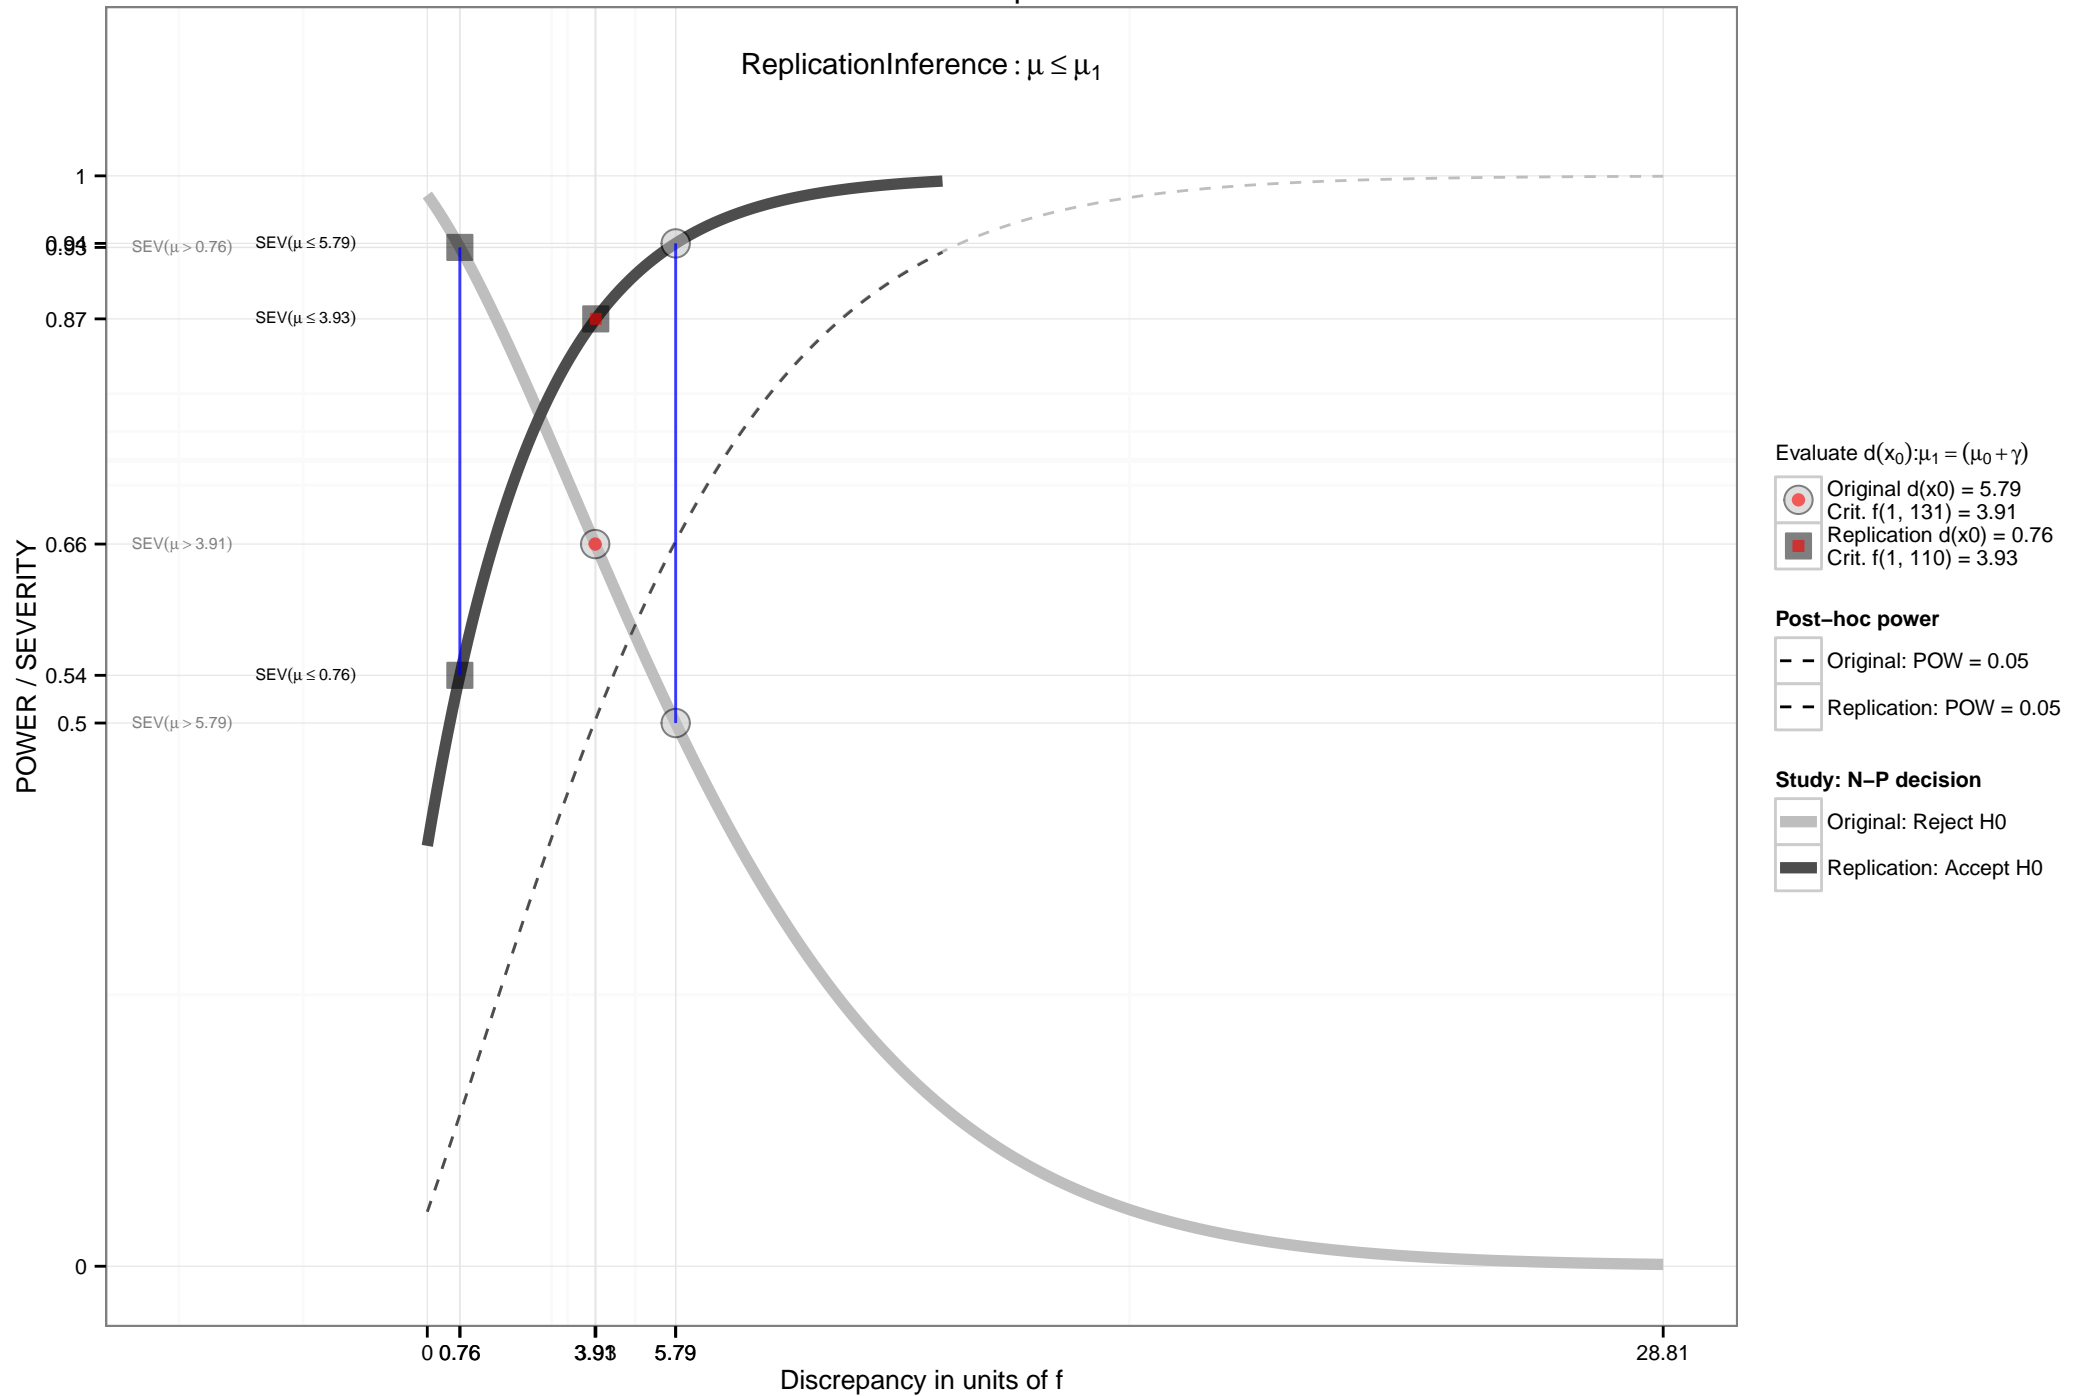

25 Not so innocent: Does seeing one's own capacity for wrongdoing predict forgiveness?

26 Conflict-triggered goal shielding: Response conflicts attenuate background monitoring for prospective memory cues.

27 Affective incoherence: When affective concepts and embodied reactions clash.

28 1/f noise and effort on implicit measures of bias.
